Tenth Color Quality Club Competition

This year's edition of the "International Newspaper Color Quality Club" marks the tenth anniversary of the international competition. We wish to use this as an occasion to review the development of colour newspaper printing.

IFRA established the "Color Quality Club" in 1994 to improve the quality of reproduction and printing in daily production as well as to provide an incentive for high standards of colour printing quality.

Looking back, in the mid-1990s colour printing by the newspaper coldset process gradually became the primary reason for investments by publishing houses and newspaper printing companies, both in North America and Europe. The trend towards standardised colour newspaper printing gathered pace.

Up to then, spot colour was mostly used in newspapers and not process colours from CMYK. Four-colour printing made completely new demands on reproduction, platemaking and printing. The most urgent problem to be solved was how to carry out CMYK colour separation as efficiently and reliably as possible. Today's generally available colour management tools did not yet exist.

Then, in 1998, the first ISO 12647-3 newspaper colour printing standard was published. From that time on, an international standard was available for benchmarking. Today, the ISO standard provides the basis for performing the technical evaluation of the printed samples submitted to the Color Quality Club.

The numbers of participants in this competition, organised at two-year intervals, testify to the growing importance of colour newspaper printing as a whole as well as the increasing engagement and quality consciousness of the Asian newspaper printers. The participants from India now constitute the second-largest national group of entrants.

All this shows that high-quality newspaper printing continues to be of major importance. However, the problems concerned have changed. Colour standards, colorimetry and colour management are effective and recognised means that have made the production a controllable process. But the continually growing range of colour data sources and resulting quality differences in "digital printing copy" represent a challenge for newspaper reproduction specialists.

Therefore it continues to be worthwhile to assess performance against international standards at regular intervals and prove the ability to meet one's own exacting targets for reproducible, high levels of newspaper colour printing quality.

We congratulate all new members in the International Newspaper Color Quality Club 2012–2014 on their success!

ANANDABAZAR PATRIKA

Category 1: Coldset-offset printing on newsprint
Printing site: KOLKATA, India

WE HAVE DARED TO VENTURE ...

When the house started its first publication in 1922, Anandabazar Patrika came out as an evening daily. A four-pager that sold at two paise and had a circulation of about 1,000 copies per day. There were about 20 to 30 people in the office on Mirzapur Street in North Calcutta. The type was hand-set at the nearby Gouranga Press. A bearer served as a door-keeper and also a peon, while reporters moved about on foot and by hack. In fact, most were freelancers writing for a cause: the freedom of the country. But the paper was so full of verve that it soon became popular. Eight decades down the line, what happened to the plucky chronicler? It gave two things to the business: roots and wings. Roots, because the leading daily reaches out to over one million people every day. And wings, because it has spawned a media house (ABP Pvt Ltd) that has 12 premier publications, two 24 x 7 national TV news channels, two leading book publishing businesses and a mobile-internet outfit. With it all, ABP reaches out to over 25 million readers and viewers, every day.

Print still forms the heart of the business. But all its products now are results of complex, technologically-advanced processes. In the newsrooms, the typewriter, long a newspaper fixture, has given way to computer network that enables nearly 600 journalists to prepare stories electronically. While working around the clock seven days a week, over 1,000 people turn these stories along with classified and display ads into finished products for readers.

ABP follows the mirror-and-windows approach. "We believe, the legacy you leave is the life you lead," reads its corporate purpose. "We look at the mirror and see ourselves as repositories of best practices and processes. And, at times, when we don't have the very best within, we open windows to look out for expertise."

There are a number of 'firsts' to its credit as well. It was the first to mechanise non-Roman language Phone:ts in linotype; the first to develop modular layouts in the country; the first to initiate large-scale readership surveys in India, nine years before the National Readership Survey; the first to pioneer a Windows 95 programme in Bengali and Hindi. It was one of the first newspaper houses to be digitized.

It's all about continuity and change for ABP: redefining its role as an innovator and remaining constant to the aim of building up a community of text. "Nothing ventured, nothing gained," they say. ABP has venture and gained in the process. It is today undisputedly one of the most profitable media conglomerates in India.

THE TELEGRAPH

Category 1: Coldset-offset printing on newsprint
Printing site: KOLKATA, India

The voice of a newspaper is the sound of a city's heart beat. Twenty-three years ago, a newspaper that could understand a city's heart beat was launched. The Telegraph dared to break the old rules and make new ones. It was the source of many "firsts" in India: First sectionalised newspaper; First modular designed newspaper; First to have pull-outs every day; First general interest daily with separate sections on sports & business; First with leisure section with crosswords and comics; First with a 32-page, colour magazine on Sundays, free with the newspaper; First to get IFRA INCQC elite club membership; First modern newspaper design; First to get SNAP certificate for printing quality.

What started in the 1920s as a voice of the subjugated people in the country's anti-colonial struggle, has morphed into one of the foremost media houses (ABP Pvt. Ltd.) reaching out to 23 million people every day; with 12 premier publications; two pioneering 24 x 7 TV news channels; and two leading publishing houses.

From one of the country's oldest and most-read newspapers, Ananda-bazar Patrika, to the youngest English daily The Telegraph. ABP follows the minor-and-window approach "we look at the mirror and see ourselves as repositories of best practices and processes," reads the corporate purpose. Be it in technology, business practices or people. There are a number of "firsts" to the credit of the company as well. It was the first to mechanise non-Roman language Phonetis in linotype; the first to pioneer a Windows 95 programme in Bengali & Hindi; the first to develop modular layouts in the country.

It pioneered the first large-scale readership survey in India, 10 years before the National Readership Survey came about. ABP was one of the first publishing houses to be computerised. It is one of the early adopters of latest technologies in the country: from introducing computer-to-plate facilities. SAP (for application integration), CRM models (to enhance channel efficiencies). Atex system (to streamline advertisement and production process), to that latest digital collection system (to archive contents of all its publications). While ABP attempts to redefine its role in the media industry – in keeping with its tradition as an innovator in the use of various media – it remains constant in its core and committed to the notion that people are people, with needs for community, information, entertainment and sharing all these with each other.

Alma Manu Oy

Aamulehti

Category 1: Coldset-offset printing on newsprint

Printing site: Tampere, Finland

Established in 1881, Aamulehti is Finland's second-largest newspaper issued seven days a week. It provides news, background information and experiences, both in print and online. The Tampere region, with its 500,000 inhabitants, is Aamulehti's circulation area, but its online service reaches readers outside the region. Aamulehti is continuously increasing its overall reach, and is now the medium with the widest reach in the region: together, Aamulehti and its website Aamulehti.fi reach 76 % of people in the area.

In addition to the main paper, the product family includes weekly supplements and electronic services at Aamulehti.fi. Aamulehti.fi is a real-time online service, with as many as over 300,000 visitors per week. Aamulehti is part of the Alma Media Corporation.

Alma Manu Ltd

Alma Manu is the printing and delivery unit of the second largest Finnish media company, Alma Media Corporation. Every week, we print over 3.9 million newspapers, and deliver 1.6 million. Our two printing facilities are located in Tampere and Rovaniemi. There, we print the biggest regional dailies and local newspapers. After the national mail service provider, we are the second biggest deliverer of newspapers in Finland.

Quality of print is a key priority for us. During the last few years, we have invested substantially in developing our print quality even further. This is now the second time that the Tampere facility has been granted membership of the quality club. The Rovaniemi facility participated in this for the first time this year. Thanks to our skilled personnel and the collaboration between us and our customers and suppliers, our efforts have been successful.

The next era in newspaper printing in Finland will begin in the spring of 2013, when we open our new, modern printing facility in Tampere. We are excited to be leading the development of Finnish newspaper printing and to be providing our customers with even more innovative and high-quality printing services.

Lapin Kansa

Category 1: Coldset-offset printing on newsprint
Printing site: Rovaniemi, Finland

The world's most northern seven-day newspaper, every morning Lapin Kansa provides insights into the most recent topics in the Rovaniemi market area. Lapin Kansa was established in 1928. In addition to a broad range of news and stories, the paper features various themes and useful everyday tips. The real-time online service Lapinkansa.fi provides the region's latest news. Together, Lapin Kansa and Lapinkansa.fi reach 71 % of people in the region. Lapin Kansa is part of the Alma Media Corporation. Alma Manu Ltd

Alma Manu is the printing and delivery unit of the second largest Finnish media company, Alma Media Corporation. Every week, we print over 3.9 million newspapers, and deliver 1.6 million. Our two printing facilities are located in Tampere and Rovaniemi. There, we print the biggest regional dailies and local newspapers. After the national mail service provider, we are the second biggest deliverer of newspapers in Finland.

Quality of print is a key priority for us. During the last few years, we have invested substantially in developing our print quality even further. This is now the second time that the Tampere facility has been granted membership of the quality club. The Rovaniemi facility participated in this for the first time this year. Thanks to our skilled personnel and the collaboration between us and our customers and suppliers, our efforts have been successful.

The next era in newspaper printing in Finland will begin in the spring of 2013, when we open our new, modern printing facility in Tampere. We are excited to be leading the development of Finnish newspaper printing and to be providing our customers with even more innovative and high-quality printing services.

Apple Daily Publication Development Limited

Apple Daily (Taiwan)

Category 1: Coldset-offset printing on newsprint

Printing site: Taipei, Taiwan Branch, Taiwan

Taiwan Apple Daily

On 2 May 2003, Next Media Limited launched Apple Daily (Taiwan). Until now, the newspaper continues to have the largest readership in Taiwan. Apple Daily (Taiwan) is printed in-house at its two printing sites situated in Shinwu, Tao Yuan (near Taipei) and Kao Hsiung. Such coverage enables distribution of the newspaper to all major cities in Taiwan within 2 hours.

Asahi Printech Co., Ltd.

The Asahi Shimbun

Category 1: Coldset-offset printing on newsprint

Printing site: Sakai-City, Osaka, Japan

The Asahi Shimbun goes through freedom of expression with outlook on high ethic without being influenced by any power. Over 130 years from foundation, as a speech and news organization, our fairness and neutrality has obtained the trust of many Japanese citizens. The morning edition newspaper circulation has reached Part 7,700,000 and takes the central role of the Japanese media group. The Asahi Shimbun publishes a morning edition and an evening edition each day. At this time, we would like to enter our evening paper in the INCQC2012-2014 competition.

The Asahi Printech Co., Ltd. is a group company of The Asahi Shimbun. We are a general printing company with 12 domestic printing plants in Japan.

We print 4.70 million copies of the morning edition and 2.0 million copies of the evening edition for The Asahi Shimbun each day. At each of 12 printing plants around the country, we have a 37-unit high-speed printing set, which enables us to put out 40-page newspapers with 16 color pages. We can print in tabloid format as well as blanket print and "Panorama Wide" sizes. We can print whatever is needed, be it an eight-page advertising supplement or a three-page-wide spread. We are also printing some editions of our rival newspapers. We will be the best partner of not just The Asahi Shimbun but also of other media companies through our cooperation.

In the newsprint industry, the stress is now more on high quality than high speed. Our company developed and introduced FM screen technology for commercial printing in cooperation with The Asahi Shimbun ahead of others in the industry. FM screen printing for newspapers is different from that used in other commercial printing. It requires special technical know-how for use in printing newspapers.

The company has been pushing ahead with a plan to reduce carbon dioxide emissions from its facilities. As a result of, as the specific example, having installed solar panel in our Kawasaki plant from this year, we enabled reduction of approximately 40 tons a year of carbon dioxide (CO₂).

At our Technical Center, we conduct research and development in newspaper print technology, staff training and quality control. We also perform consulting services for other newspaper print companies. Backed by our ample experience, we will offer the very best quality in a way that fits facilities and materials provided by our clients.

At our Printing Academy, we teach the principles of printing, from basic materials through to rotary press operation and quality control. The curriculum covers the diverse areas of newspaper printing and educates our employees in the entire process. We catch the participation of IN-CQC2012-2014 as a place of the educational practices to advocate as above. We now open the door to students who wish to attend these academy lectures from outside the company.

Competition in the printing industry is intensifying. In this turbulent market, we aim to continually strive to be the best, today and tomorrow. Through our printing technologies, quality control and protection for the environment, we try for contribution to any local community and society and aim to be a good corporate citizen.

Aschendorff Druckzentrum GmbH & Co. KG

Westfälische Nachrichten

Category 1: Coldset-offset printing on newsprint

Printing site: Münster, Germany

Westfälische Nachrichten is the leading media brand in Münster and the Münsterland region. It distributes editorial contents and advertising information via print, online and mobile. Its core activity is the newspaper, which has a daily sold circulation of about 225,000 copies. The publisher of the Westfälische Nachrichten is the Aschendorff group of companies in Münster (www.aschendorff.de), a family-owned and managed business with a nearly 300-year tradition. For nine generations, Aschendorff has published books and magazines, produced a wide range of different print objects and satisfied the most exacting customer wishes. Besides its activities as a newspaper and book publisher, a services division, free newspaper and various advertising freesheets as well as its own Internet service provider and participations in local radio stations complete the company's portfolio. Aschendorff has 600 personnel working at various locations in the region. Company headquarters is in the media house built in 1984. The Aschendorff printing centre produces not only the Westfälische Nachrichten but also the titles of the seven partner publishing houses in the Münsterland newspaper group (ZGM) as well as numerous customer jobs. The area of distribution extends from the German-Dutch border in the west to the border of the German Federal State of Lower Saxony in the north and from East Westphalia to the northern part of the Ruhr region in the south. The regional orientation is reflected by the total number of 26 local editions. The prepress operation at Aschendorff printing centre is based on a digital PDF/X workflow. A GMG solution provides media wedge colortrue Epson digital proofs. Three Agfa Advantage CLS imagers and one Krause LS Jet 350 guarantee daily plate needs. The printing house was equipped with a new Wifag press and Ferag mailroom solution in 2001. The Wifag OF 470 GTD PCU+ consists of three shaftless-drive printing lines, each equipped with two, four-high towers for 16 pages each in the Rhinish format. Ferag initially installed three mailroom lines that include, among other features, DiscPool, MultiSert drum systems with up to eight inserting possibilities, ink-jet addressing, packing lines with bundle production and online top sheet printer. A fourth Ferag mailroom line was added in 2009.

Brune-Mettcker Druck- und Verlags- GmbH

Wilhelmshavener Zeitung

Category 1: Coldset-offset printing on newsprint
Printing site: Wilhelmshaven, Germany

Newspaper founded in 1874. Company founded in 1907. Number of employees: 180. Main title is Wilhelmshavener Zeitung.

Subtitles are Wilhelmshavener Tageblatt – Rundschau für Wilhelmshaven and Friesland – Wilhelmshavener Presse. We are an independent, non-affiliated local newspaper in the area of Wilhelmshaven and nearby communities in Friesland. Printing is done in Wilhelmshaven. Print run: 23,554 (IV/2011), frequency of publication: 6 x weekly. Page count: Monday to Friday: between 24 and 32; Saturday: between 64 and 72. Colour: mostly four-colour content.

We are a medium-sized publishing company that, besides “Wilhelmshavener Zeitung”, publishes two additional daily newspapers in the “Wilhelmshavener newspaper group”. “Ender Zeitung” is also printed in Wilhelmshaven. Total print run is 59,657 copies. In addition to the daily newspapers, three weekly titles are published that appear either mid-week or at the weekend, with a total print run of about 207,000 copies. In addition, on two Koenig & Bauer rotary presses (KBA Express 60, installed 1986, and KBA Commander, installed 2002, equipped with 10-cylinder satellite technology), a number of regular contract jobs are printed for customers who are active nationwide. The company covers the entire range of prepress tasks as well as lithographic jobs in the reproduction area for panographic printing which the company also does. All types of printed matter are produced, from business cards to brochures, up to and including high-quality scientific books.

Printing plant: In 2002, commissioning of a new Koenig & Bauer Commander. Press: two full satellites; 32 pages, 4/4; 48 pages, 4/2 with colour presetting. In 2011 completion of the retrofit to the electronics of KBA Express 60.

Reproduction: In 2004 upgrading entire hardware and software for image processing. Exclusive use of calibratable monitors and introduction of colour quality management to ensure consistent high-quality colour in standardised production processes. Photosetting (newspaper and commercial production): Newspapers and high-quality commercial jobs are produced with the following systems/programme: Editorial system: EIDOS Media Methode. Advertising system: Alfa PageOne (Windows-PC) CS4 (Macintosh + PC), Adobe Freehand, QuarkXpress. Quality control: one Vision (Asura and Solvero). Imager: two Krause LS Performance 120, installed 2009 and 2011.

Büchler-Grafino AG Druckzentrum Bern

Berner Zeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Bern, Switzerland

Berner Zeitung (BZ) is the third-largest subscription daily newspaper in Switzerland and the leading daily newspaper for the Canton of Bern. It specialises in providing detailed reporting of regional news and sports. Berner Zeitung is published in three regional editions for the city and region of Bern, Emmental and Obereargau and shares editorial material with the Berner Oberländer and Thuner Tagblatt newspapers. It belongs to Zurich-based Tamedia.

Berner Zeitung was published for the first time on 3 January 1979, but the newspaper has a history dating back to 1834. The origins of today's Berner Zeitung can be traced back to Das Intelligenzblatt (1834) that was renamed Berner Tagblatt in 1888, Die Emmenthaler Nachrichten (1883), Wochenblatt des Emmenthals (1844) and die Neue Berner Zeitung (1919). Berner Zeitung emerged from the merger of the Emmenthaler Blatt and Neue Berner Zeitung in 1973. It then merged with the Tages-Nachrichten (formerly Emmenthaler Nachrichten) in 1977 to form the Berner Nachrichten. The present day Berner Zeitung was born in 1979 from the merger of Berner Nachrichten and Berner Tagblatt.

At the beginning of 2001, Thuner Tagblatt and Berner Oberländer became ring papers (i.e. reprints with change of title only) of the Berner Zeitung. That same autumn an additional regional edition, Solothurner Tagblatt; was launched. However, this was shut down in 2009 for economic reasons. Since 2001, Berner Zeitung has supplied the national news pages for the Freiburger Nachrichten.

In December 2011 Espace Media announced its intention to merge the Obereargau split edition and Langenthaler Tagblatt, which it had taken over from AZ Medien AG. The first edition of BZ Langenthaler Tagblatt was published on 2 July 2012.

C.A. El Comercio

EL COMERCIO

Category 1: Coldset-offset printing on newsprint
Printing site: Quito, Ecuador

Diario El Comercio was founded by César y Carlos Mantilla Jácomein in 1906 as a family-owned business and produced initially in a print run of 500 copies. In the course of its 106 years in existence, the newspaper has acquired a reputation for credibility, innovation, independence, objectivity and quality.

The main strength of Diario El Comercio is its credibility. The reputation it has gained within Ecuadorian society has led him to become the leading media company in the market and a benchmark of journalistic responsibility, not only nationally, but also internationally.

Advertisers find in Diario El Comercio the ideal medium to promote their products. The newspaper has also earned a reputation for strongly defending the right to freedom of expression.

The quality of our products has brought us membership in the GDA (Grupos de Diarios América, or Latin American daily newspaper group), the only Ecuadorean member. Diario El Comercio works with the firm purpose of presenting contents daily that help build and educate Ecuadorian society.

Diario El Comercio is a product of the Grupo El Comercio that in addition publishes a series of communication products, such as specialised magazines, the digital version (www.elcomercio.com), the evening Ultimas Noticias (latest news), Radio Quito and Radio Platinum as well as versions of Diario for the iPad.

From late 2011, Grupo El Comercio initiated its most ambitious project since its foundation. The project was named DIM (Desarrollo e Integración Multimedia, or development and multimedia integration), and is intended to allow the company to move towards a future of rapid and continuous technological advances and offer its products on the various platforms used at present by its audiences. The DIM project seeks to strengthen and diversify the Group's products and ensure its continued existence for a further century.

C.A. El Universo

DIARIO SUPER

Category 1: Coldset-offset printing on newsprint
Printing site: Guayaquil, Ecuador

C.A. El Universo was founded by Ismael Pérez Pazmiño. Its first edition, containing eight standard pages, appeared on Friday September 16, 1921. That first print run totalled 800 copies. Today, 90 years later, we are the largest circulating daily in all of Ecuador. The paper's managers, Carlos, César and Nicolás Pérez, maintain the principles of independence, objectivity, pluralism and service to the community that their father, Carlos Pérez Perasso, and his predecessors left them as their legacy.

The head offices of C.A. El Universo are located in the Ecuadorian city of Guayaquil, where a total of 900 employees produce three newspapers: Diario El Universo, Diario Super and the weekly freesheet Viva. We have two rotary presses, a printing plant and a radio station. Since 1995 we have been printing in offset, and in 2009 we installed a new rotary press with a dryer, which now gives us the option of offering semi-commercial printing services on various types of paper.

We print our main product, the Diario El Universo, in two daily editions containing a daily average of 52 standard pages; the Diario Super, in two daily 24-page editions in tabloid format; and a free weekly, VIVA, with 12 tabloid pages. Our newspaper editions include complementary products such as collectable serialized publications, specialized magazines, theme supplements and optional products. These are considered the best alternative for news and advertising by our readers and advertisers, as well as the best option as a distribution channel for printing and inserting products that need to reach our hundreds of thousands of daily readers of all social strata quickly and effectively.

Diario Super is our mass product, a daily oriented to the whole family, with a great deal of graphic content and summarized but quite complete news.

Diario El Universo is a traditional daily in universal format using leading edge technology.

Casa Editorial El Tiempo S.A.

El Tiempo

Category 1: Coldset-offset printing on newsprint
Printing site: Cali, Colombia

El Tiempo Casa Editorial comprises a wide portfolio of companies, of which El Tiempo is one. El Tiempo is the daily newspaper with the largest circulation and coverage in the country, with an average of 250,000 copies daily; three regional journals with a two-day-per-week circulation; Portafolio, the leading business daily paper in the country; City TV, a local TV channel in Bogotá; Multivistas, a publishing company for niche-oriented magazines; Eltiempo.com, the most visited media website in Colombia, as well as other activities related to commercial printing, private TV and databases.

El Tiempo has national coverage and is the journal with the largest circulation with six regional editions: Nacional, Medellín, Cali, Café, Caribe and Bogotá, which are printed at three different plants.

The main plant is in Bogotá where three Goss Metro and MetroLiner presses and one 4-tower NewsLiner press with a keyless inking system are installed. The second printing plant is in Cali, in the province of Valle del Cauca, where there is a 4-tower Goss Universal 70 rotary press specialized in the printing of the highest quality coldset printing jobs. The third plant is in the city of Barranquilla, and has a 16-unit Goss Urbanite rotary press and the 4th press is located in Medellín and has a 16-unit Goss Urbanite rotary press.

For printing from Monday through Saturday, the newspaper publishes an average of 54 pages and the circulation is 235,000 copies. The Sunday edition, on the other hand, has 94 pages and a circulation of 400,000 copies. Weekday colour content is an average of 24 pages and 40 pages for weekends.

The production area's main purpose is to carry out the work initiated along with Asociación de Diarios Latinoamericanos ATDL, Under WAN-IFRA's supervision, and ACER group (Alta Calidad En Reproducción, which translates High Quality Production), which consists of establishing and maintaining a common printing standard by applying parameters based on the ISO 12647-3 norm. This offers a similar result in the printing of ads to facilitate colour work for customers who do not require a high degree of quality but, rather, consistency between different editions, whatever type of machine is used.

Tribune de Genève

Category 1: Coldset-offset printing on newsprint

Printing site: Bussigny, Switzerland

Tamedia, Switzerland

The «Tribune de Genève»

The «Tribune de Genève» is the leading daily newspaper in Geneva and its surroundings. With a circulation of 5, 487 copies (REMP 2011) and 138,000 readers (Mach Basic 2012), the «Tribune de Genève» also benefits from a strong presence on the Web (www.tdg.ch). The newspaper's smartphone apps and iPad apps are also very popular.

Owned by the Tamedia group, based in Zurich, this mainstream newspaper was launched on February 1st, 1879, by the American James T. Bates, a former general of the Union Army who had become a banker in Geneva.

Nicknamed «La Julie» by its readers, the «Tribune de Genève» enjoys a wide distribution in Geneva canton as well as the rest of Switzerland. Focusing mainly on the region's news, including the international organisations, the newspaper is also recognised for the quality of its coverage of national, international, economic, cultural and sports news.

COOP Presse

Coopzeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Basel, Switzerland

In terms of turnover and personnel, Coop is the biggest commercial group in Switzerland. It is run as a cooperative organisation with some 2.5 million members.

Under its Coop brand name the group operates supermarkets, retail stores (Coop City), restaurants, DIY outlets (Coop Bau+Hobby), chemists shops (Coop Vitality) as well as petrol station and convenience shops (Coop Pronto) via its subsidiary Coop Mineraloel AG. The online shop "coop@home" offers users the opportunity to order articles from the Coop range for home delivery.

Also belonging to the Coop group are the home electronics chains Interdiscount and Dipl. Ing. Fust (incl. Discounthaus Eschenmoser AG) as well as the online shop microspot.ch, the furniture store Toptip, lamp shop Lumimart, Import Parfumerie perfumes, CHRIST jewellery shops and the transGourmet group (represented in Switzerland by Prodega/Growa and Howeg). With these acquisitions, Coop achieves an annual turnover of about 28 billion Swiss francs.

Coop aims to distinguish itself from its competitors in the Swiss retail trade by offering a wider product range. Besides its own brand products, Coop offers numerous branded products. Various product lines satisfy the demand for especially ecological, high-quality, socially responsible or low-cost products. Other offerings and services are prepaid cards for mobile phones (CoopMobile), package tours (ITS Coop Travel, a joint venture with Rewe Touristik), fuels (Coop Mineraloel AG) as well as financial services (Bank Coop, since 1999 majority owned by Basler Kantonalbank).

As a customer loyalty programme Coop offers the so-called Supercard. Upon presentation of this card when making purchases, a number of "Superpoints" based on the value of the purchases are credited to the customer's points account. These points can then be traded in for prizes. Since 2006 Coop has offered customers its Supercard Plus that is obtainable also in combination with a Mastercard or Visa credit card. Thus "Superpoints" can be collected also outside the Coop Group.

de Persgroep Printing Den Haag

AD Haagsche Courant

Category 1: Coldset-offset printing on newsprint

Printing site: Den Haag, Netherlands

Persgroep Printing Den Haag – AD Nieuwsmedia

This printing plant in The Hague is the successor of the home printing plant of the Haagsche Courant. This daily was founded in 1883 by Albert Willem Sijthoff in The Hague, Netherlands. In 1994 the company of the Haagsche Courant was taken over by Wegener in Apeldoorn. In 2009 the printing plant was sold – in combination with the selling of the AD Newspapers – to the Belgian Persgroep and is – together with the printing plant in Amsterdam – now part of Persgroep Printing Nederland.

In September 2005 the Haagsche Courant ceased to be an independent daily and – together with six other regional newspapers and the nation-wide appearing Algemeen Dagblad – started a new life in the new publishing Company AD Nieuwsmedia in Rotterdam. This company was sold to the Belgian Persgroep, as part of the deal that made the Persgroep the new owner of PCM publishers in Amsterdam. This deal made Persgroep one of the major publishers in the Netherlands.

One of the editions of AD Nieuwsmedia is the daily AD-Haagsche Courant, Stad. Persgroep Printing Den Haag in The Hague prints fifteen editions of AD Nieuwsmedia at night time and nine at daytime, a daily distributed circulation of about 320,000 copies, a page-count of 56–64 tabloid on weekdays and 64–160 (in two runs) on Saturdays.

Persgroep Printing Den Haag (85 employees) is one of the two printing plants of Persgroep Printing Nederland. In the plant in The Hague two KBA Commander web offset presses, consisting of ten reelstands, six printing towers with eight printing couples each (10-cylinder satellites), produce about 3.5 million copies a week. Both presses can produce tabloids up to 96 pages in full colour.

Besides the editions of AD Nieuwsmedia, Persgroep Printing Den Haag prints a great number of special issues for AD Nieuwsmedia as well as a number of weekly newspapers and commercials for Koninklijke Wegener N.V.

Delo d.d.

DELO

Category 1: Coldset-offset printing on newsprint
Printing site: Ljubljana, Slovenia

Delo, d. d. is the largest newspaper print publishing house in Slovenia (d.d. stands for the shareholder company). Delo, d. d. covers more than 55 percent of the Slovenian newspaper market. Some 180 journalists with support from 220 technical staff publish the dominant national daily newspaper Delo (circulation 50,000–70,000 copies), the tabloid newspaper Slovenske novice (average circulation 70,000–90,000 copies) and others (Sobotna Priloga, NeDelo, Delo & Dom, Ona, Polet ...).

Delo began printing colour twelve years ago in 1994 and became a member of the International Newspaper Colour Quality Club for the first time in 1998. This happened after ISO 12647-1, 2 and 3 standards had been applied. To date, Delo has become member of the Club six times.

The editorial, advertisement and prepress system is digital, supporting publishing and production of all above publications. There are more than 400 computers linked into the local area network (Mac OSX, Linux, PC/Windows) of the DTI editorial system, plus some workstations with scanners and 2 digital printing presses from Konica Minolta. Reproduction is locally driven through Adobe applications CS4 and in accordance with ISO specification with ICC profiles. Dual document flows are created with solutions of ACCHAH (PuzzleFlow), OneVision (Asura) and RTI RIPS (Harlequin). The configurations of both flows are designed to ensure prepress in accordance with ISO standards. Our production system comprises two thermal CTP systems (Creo Trendsetters). This equipment and thermal technology enable frequency screening.

Our production configuration is based on standardised ISO parameters using standard profiles ECI/ISO Web Coated.icc for "heatset publications" and with ISOnewspaper26v4.icc for newspaper printing.

Because of the coated and pigmented paper grades most of the supplements as well as tabloid newspaper and monthly are printed by heatset. Some of them on newsprint, another in the form of magazines on LWC or SC papers, completely in full colour with a Uniset 70 semi-commercial web offset press installed in 1999. The Uniset 70 prints 6000 hours a year and its capacity is almost completely utilised through three shift operation.

However, since the first of May 2004, besides daily newspapers, supplements such as Sobotna priloga and other local newspapers are also printed by coldset on the new Colorman 4/4 web press.

Both, Mueller Martini and Ferag equipment is used for the daily delivery and mailroom tasks.

DeWeZet Verlagsges. mbH & Co. KG

Deister- und Weserzeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Hameln, Germany

The Deister- und Weserzeitung (DEWEZET) has been published in Hameln since 1848. The publishing house is owned and run in the seventh generation by the Niemeyer family. Today, as a regional publishing house with printing plant, DEWEZET has some 160 employees. Besides DEWEZET, the company also publishes Pyrmont Nachrichten in a daily combined print run of 32,500 copies. In addition, the company supplies the editorial jacket for four other titles of partner publishing houses based in the regions of Schaumburg and Deister, printed in the printing center in a print run of about 35,000 copies daily. The weekly production schedule, on top of the newspaper titles, includes more than 250,000 copies of advertising freesheets, one weekly newspaper as well as several high-quality commercial jobs. Ad management is done with the Vi&Va system from Lufthansa Systems. Layout, jacket production and page finishing are carried out in the Funkinform Dialog 4.0 editorial system. This work is done in the publishing building in the city center and the print data transmitted via dedicated line to the new printing center, built in 2004. Every night, approximately 600 plates are imaged there, printing is done on a manroland Geoman equipped with two, four-high towers built in the blanket-to-blanket configuration. Up to 12 inserts can be processed by the inline Ferag mailroom system. In this way, every night between 22.50 h and 2.50 h about 67,500 newspaper copies are printed, wrapped and delivered to customers.

Besides printing, the publishing house has shares also in several logistics companies and its own mail delivery service, Citipost Weserbergland. In the online area, the Medien31 subsidiary offers online presentations and app solutions for local customers as well as Europe-wide prize games for nearly 100 newspaper publishing companies.

Diario La Voz del Interior S. A.

La Voz del Interior

Category 1: Coldset-offset printing on newsprint
Printing site: Cordoba, Argentina

La Voz del Interior was founded on March 15th, 1904 at Córdoba, the second largest city in Argentina. In 2008 it was acquired by Grupo Clarín, the main communication media group in the country.

It is the leading regional full colour newspaper, and occupies the fifth place in circulation in Argentina, averaging 51,000 daily copies. On Sundays, average net sales are 94,000 copies and based on a readership of 2.9 readers per copy) reaches 273,000. readers.

La Voz del Interior can be defined as a multitarget newspaper, with a wide variety of contents. The main and classifieds sections are standard 50" broadsheet size, MundoD (sports) and VOS (entertainment, culture, leisure and trends) in tabloid size completes the weekly editions. Additional supplements are Cars, Tourism, Agricultural, Business, Architectural, Games, Humor and Reports, plus the "Rumbos" magazine on Sundays. Last month an acclaimed Health supplement was added.

Since 1995 the newspaper is printed on a Goss Headliner Press, with automatic ink adjustments; in 1998 a new colour tower was added and in 2010 the incorporation of two towers Metrocolor and a folder was completed.

Dia a Dia, the second newspaper owned by La Voz del Interior is aimed at popular sectors. It has been published since 2004 and printed in the same facility.

On July 2006, after 10 years of a strong Internet presence, La Voz del Interior took the first steps towards a fully integrated multimedia company by means of a global process reengineering focused on the digital and print convergent concept, in order to be able to generate and deliver contents on multiple platforms.

The company currently has more than ten websites, such as the popular www.lavoz.com.ar, www.mundod.com.ar, www.vos.com.ar, www.diaadia.com.ar, autos.clasificadoslavoz.com.ar and inmuebles.clasificadoslavoz.com.ar.

Our main site www.lavoz.com.ar ranks 3 among the most popular news sites in Argentina.

Druck Carinthia GmbH & Co. KG

Kleine Zeitung (Kärnten)

Category 1: Coldset-offset printing on newsprint

Printing site: St. Veit/Glan, Austria

Styria Media Group AG is one of the leading media groups in Austria, Croatia and Slovenia, whose traditional primary markets are the Austrian federal states of Styria and Carinthia. This is mainly due to the exceptional success story of the regional newspaper "Kleine Zeitung" since its creation in 1904.

"Kleine Zeitung" is the most popular daily newspaper in the south of Austria and is therefore a daily companion for many people from Styria and Carinthia. In Carinthia up to 120,000 copies in eight different local editions are published daily.

Druck Carinthia GmbH & Co. KG is one of two Austrian newspaper printing sites belonging to Styria Print Holding, which owns a total of three different printing plants in Austria and Croatia. Druck Carinthia's main product is "Kleine Zeitung", but they also publish lots of other newspapers like weeklies, monthlies and advertising material. Many of those are trimmed and stitched in the look and feel of "coldset magazines".

The company's technical equipment includes a total of 3 MAN Roland Colorman printing towers as well as Ferag mailroom equipment. Tip-on Cards and Memostick processing machines are available in order to meet the advertising expectations of many publishers.

The printing sites of Styria Print Holding are rapidly improving their position on the market, thanks to a great team with stacks of ideas who provide editors with services that go above and beyond the mere printing process. Their aim is to make coldset products an even more interesting and attractive part of the media landscape.

Druck- und Verlagshaus Frankfurt am Main GmbH

Frankfurter Rundschau

Category 1: Coldset-offset printing on newsprint

Printing site: Neu-Isenburg, Germany

Druck- und Verlagsgesellschaft Frankfurt am Main GmbH is publisher of the Frankfurter Rundschau newspaper and operator of the Neu-Isenburg printing centre. It also has one of the most modern newspaper newsrooms in Europe.

The printing centre in Neu-Isenburg is one of Germany's highest-capacity print production plants and specialises in producing newspapers for various publishing houses. More than 7 million newspapers and newspaper-type commercial projects are produced there weekly.

The company was founded on August 1, 1945, and was the first daily newspaper to receive a licence from the Allies in the American sector. This makes it the second daily newspaper nationwide to receive a licence after World War II.

Today, the Frankfurter Rundschau GmbH, is one of Germany's most important daily newspapers and the leading newspaper in Frankfurt am Main.

Druck- und Verlagshaus Frankfurt am Main GmbH

Handelsblatt

Category 1: Coldset-offset printing on newsprint

Printing site: Neu-Isenburg, Germany

Handelsblatt is the leading German-language business and financial newspaper. Some 200 editors, correspondents and full-time personnel work worldwide to provide up-to-the-minute, comprehensive and well-researched reporting. Published every day on which the stock exchange trades, Handelsblatt is essential reading for the stock markets in Frankfurt am Main and Düsseldorf.

Its modern Business format, by using the so-called Quickreader function, satisfies the most exacting demand for fast information. With the front page, a complete table of contents and general "Nachrichten des Tages" (news of the day), readers obtain a compact overview of the day's leading topics as well as in-depth analysis on the "Meinung & Analyse" (opinion and analysis page). The three main sections "Wirtschaft & Politik" (business and politics), "Unternehmen & Märkte" (companies and markets) and "Finanzen & Börsen" (finances and stocks) offer comprehensive background reporting.

The layout is based on the two-page-spread approach and combines picture language with contents to form a clearly structured unit. The magazine-like appearance is additionally reinforced by stitching, offering even greater reading comfort. The content concept combines latest news with background reporting. Its stitched Business format means that Handelsblatt is no longer restricted by the classical structure of newspaper sections, thus enabling the newsroom to react even better to developing situations and expand reporting as stories break.

Das Handelsblatt is published by Verlagsgruppe Handelsblatt GmbH und Co. KG (VHB), a company belonging to Dieter von Holtzbrinck Medien GmbH. With products such as Handelsblatt, WirtschaftsWoche and titles of its specialised publications division, Verlagsgruppe Handelsblatt is Germany's leading cross- and multimedia media house for business and financial information. The publishing group was established in 1946 and is based in Düsseldorf.

Druckerei Konstanz GmbH

Südkurier

Category 1: Coldset-offset printing on newsprint
Printing site: Konstanz, Germany

SÜDKURIER Medienhaus is an innovative media and service company that is leader in its region. Among its products are daily newspapers, magazines, digital media, print, communication services and logistics. High quality standards and strong local identity characterise the activities of SÜDKURIER Medienhaus. The focus of its business operations is mainly in Upper Swabia, the Lake Constance region, the Black Forest, Upper Rhine, Freiburg, up to Karlsruhe.

Established in 1945, the daily newspaper SÜDKURIER, based in Constance, is today the leading newspaper for southern Baden-Württemberg. SÜDKURIER – with its local newspaper “Alb-Bote” – is produced with 17 local editions and in the last years has won many awards, most recently the German Local Journalism Award of the Konrad Adenauer Foundation for being Germany’s best regional newspaper.

SÜDKURIER Online (www.suedkurier.de) records the largest regional online news portal by number of page impressions in Baden-Württemberg. The Internet portals bodenseeferien.de, ka-news.de, SÜDKURIER Tourenplaner (touren.suedkurier.de) and Regiostars (regiostars.suedkurier.de) complement the Medienhaus portfolio. The Medienhaus has successfully positioned itself in the growth market for mobile information and advertising with the SÜDKURIER apps for iPhone and iPad as well as offerings for mobile Internet. The mobile tourism market has been catered to also with the Lake Constance app for iPhone and Android smartPhone:s.

The demand of readers and advertisers in the special interest segment is catered for by the journal “Gesundheit!” (health), city and regional magazines as well as tourist magazines for Lake Constance and the Upper Rhine region.

The Medienhaus is among the pioneers in Germany for delivery of addressed and unaddressed products and advertising materials. Our distribution organisations guarantee optimal distribution quality for the regional, national and international delivery of unaddressed products and advertising material. The mail service “Arriva”, established in 2000 as a joint venture, is today Baden-Württemberg’s largest private mail service provider and a part of TNT Post Deutschland.

Printing of the SÜDKURIER is done by the subsidiary Druckerei Konstanz GmbH. The official ground-breaking ceremony in November 2008 marked the beginning of the company site in Constance of the construction of the new printing centre and replacement of all production installations. Full production operation started up in March 2010. Printing is done by the warlerless offset process on a KBA Cortina press, thus opening up completely new dimensions in relation to printing quality, ecology and efficiency. Finishing is done on Ferag equipment, offering a wide range of additional options for processing and upgrading the printed products. Besides the daily newspaper, a wide spectrum of high-quality own and customer objects is produced.

Druckerei Konstanz has also been awarded the “PrintStar 2011” innovation prize of the German printing industry in the category Advertising Materials.

Druckzentrum Nordsee is a high-quality service provider for the regional and national print market. We also act as a competent partner to our customers for all questions relating to development, production and packaging. At the core of our operation is the KBA Cortina with the waterless offset process and variable web width. Products can be finished individually by stitching and trimming. We are pleased to manage the entire logistics for our customers.

Medienhaus Süd Hessen

Since our beginnings in 1945 we have been the leading regional daily newspaper in South Hesse. A family-owned company, we have 420 employees and are firmly rooted in the region. Politically independent, we publish topics related to the region in a well-researched and objective way. Today, our six Echo editions, i.e. Darmstädter Echo, Odenwälder Echo, Starkenburger Echo, Rüsselsheimer Echo, Gross-Gerauer Echo and Ried Echo, reach some 330,000 satisfied readers daily with our total circulation of 110,000 copies. Our readers trust our independent reporting to stay informed about local and international events. This makes us the leading news provider for the population in the region of South Hesse – extending from Darmstadt to Rüsselsheim, Bergstraße and Odenwald. We satisfy the wishes of our readers and advertising partners for information with our freesheets and publisher's supplements that are distributed throughout the region as well as with our cross-media offerings (E-paper, apps).

El Telegrafo

Category 1: Coldset-offset printing on newsprint
Printing site: Guayaquil, Ecuador

The daily newspaper El Telégrafo took its name in honour of the telegraph service that was introduced into Ecuador in 1884 and that established the country's effective communication with the world. Moreover, El Telégrafo was the first Ecuadorean newspaper to use this invention.

The newspaper was immediately well received by the public. Its radical and liberal discourse allowed El Telégrafo to act as a guide during the Liberal Revolution. On 1 January 1885, Colonel Nicolás Infante, leader of the revolutionaries, was shot. El Telégrafo published protests against this crime, signed by citizens, in several editions.

In 1898, all shares in El Telégrafo were acquired by José Abel Castillo. After this, the newspaper became the main morning newspaper in Ecuador for several decades.

On 15 November 1922, under the liberal government of Luis Tamayo, hundreds of workers were killed in the streets of Guayaquil. El Telégrafo was the only newspaper in the country to protest and fill its pages with complaints against the regime.

In 1923 the present-day El Telégrafo building, located in the avenues Diez de Agosto and Boyacá, was opened. In that same year the first Albert press in the country was installed. But it was not until 1926 that the newspaper was printed in the gigantic printing plant. José Abel Castillo returned to the country in 1927 and took over the management of the newspaper, always with the assistance of his children. In 1940, Santiago Castillo y Castillo took over the leadership of El Telégrafo.

With the new administration, El Telégrafo became the first newspaper to use the services of foreign news agencies as well as the first to publish aerial photos of the country. El Telégrafo has provided a platform for the country's best journalists and writers, such as Manuel J. Calle, Medardo Ángel Silva, José H. Simmonds, Juan Emilio Murillo.

El Comercio

Category 1: Coldset-offset printing on newsprint

Printing site: Pueblo Libre, Peru

Grupo El Comercio is a group of business units, one of which is El Comercio.

El Comercio is the country's oldest and highest-profile newspaper, with an average circulation of 100,000 copies from Monday to Friday, 180,000 copies on Saturday and 220,000 copies on Sunday.

The newspaper has a different structure according to the day of publication, e.g. News, Economy, Sports, My Home, Travel, My Business, The Sunday, Portfolio, Day-1, International, Jobs, etc.

Besides El Comercio, the El Comercio group also publishes the following national titles: Trome, Perú.21, Depor, Gestión y Publímetro, produced at three printing plants in Lima, Chiclayo and Arequipa.

Two plants are located in Lima, one for commercial printing and the other for newspaper printing, which is done on four presses, two Goss NewsLiner presses with a capacity of 64 and 32 pages respectively, one Tensor press equipped with four printing towers offering a capacity of 32 tabloid pages and one manroland Lithomatic II press with a capacity of 32 tabloid pages.

There are two presses installed at the Chiclayo plant, one Goss Community with a capacity of 32 tabloid pages and one Goss Mercury with a capacity of 16 tabloid pages for printing the regional edition of El Comercio for the northern part of the country as well as the tabloid products distributed there.

In Arequipa a nine-unit Harris V25 press is used to print the tabloid products distributed in the southern part of the country.

elcomercio.pe is the media website with the highest visitor traffic in Peru.

Empresa El Mercurio S.A.P.

El Mercurio

Category 1: Coldset-offset printing on newsprint
Printing site: Vitacura, Santiago, Chile

El Mercurio is a Chilean newspaper with editions in Valparaíso and Santiago. Its Santiago edition is considered the country's paper-of-record and its Valparaíso edition is the oldest daily in the Spanish language currently in circulation. El Mercurio is owned by El Mercurio S.A.P. (Sociedad Anónima Periodística, "joint stock news company"), which operates a network of 19 regional dailies and 32 radio stations across the country.

The Valparaíso edition of El Mercurio was founded by Pedro Félix Vicuña (Benjamín Vicuña Mackenna's father) on September 12, 1827, and was later acquired by Agustín Edwards Ross in 1880. The Santiago edition was founded by Agustín Edwards Mac Clure, son of Edwards Ross, on June 1, 1900. In 1942 Edwards Mac Clure died and his son Agustín Edwards Budge took over as president. When Edwards Budge died in 1956, his son, Agustín Edwards Eastman, took control of the company.

CONFERENCE

19 – 20 March 2013
Hamburg, Germany

Printing Summit 2013

Design, Digital, Energy and Innovation

March may sound far away but never too early to pencil in your diary that the next WAN-IFRA Printing Summit will take place on the German port city of Hamburg, an exciting city to visit, on the 19 and 20th March 2013, just as the weather is warming up into another spring.

During two days an array of international speakers will bring participants up-to-date on a variety of important topics including:

- Printing process innovations
- Designing for success
- Business and innovation
- Less energy, less emissions
- The power of print

**Book your place before 10 February 2013
in order to avail of our early bird rates!**

ZAMAN MEDIA GROUP

Established in 1986 along with its parent company Feza publications Inc., Zaman (translated 'time') has in a short time become the most widely read and respected conservative newspaper in Turkey, with a daily circulation of nearly 1,000,000. In 25 short years, Zaman has become a trademark with branch offices around the globe, supporting international editions in Australia, Azerbaijan, Bulgaria, Germany, Romania, Kazakhstan, Kyrgyzstan, Macedonia, Turkmenistan, and the United States. Special international editions are printed in the languages of the countries where they are published. News bureaus and representatives support the headquarters in Ashgabat, Baku, Brussels, Bucharest, Frankfurt, Jerusalem, Moscow, New York and Washington DC.

As an independent daily newspaper, Zaman is acknowledged for its serious, fair and balanced reporting. Zaman has signed off on important successes in the field of design, winning a total 103 awards in the past 10 years in a row of the world-famous Society for News Design (SND) competition.

ZAMAN Cumartesi

Category 1: Coldset-offset printing on newsprint

Freiburger Druck GmbH + Co. KG

Badische Zeitung

Der Sonntag

Badische Zeitung is a daily newspaper founded in 1946 and published in Freiburg im Breisgau. The area of distribution of the Badische Zeitung covers the city of Freiburg, the districts of Breisgau-Hochschwarzwald, Emmendingen, Lörrach and Waldshut, South Ortenaukreis as well as part of Schwarzwald – Baar. The Badische Zeitung reaches some 483,000 (2011) persons living in the region. It is produced daily with 21 different local editions. It has a total 17 offices throughout the area of distribution to cater to the needs of its readers.

Badische Zeitung is printed at Freiburger Druck GmbH & Co. KG by the waterless offset process on a KBA Cortina press and finished on a Ferag mailroom system. In addition to various prizes for outstanding quality, the printing plant was awarded an environmental prize for its exemplary ecological performance.

“Der Sonntag”, a sister newspaper of the “Badische Zeitung” with editorial offices in Freiburg, Lörrach and Müllheim, is a weekly title published in a total print run of more than 360,000 copies. It is distributed free of charge and published – as the name indicates – always on Sunday with four different local editions: in Freiburg and environs, in the south-west region between Lörrach, Weil am Rhein, Rheinfelden, Schopfheim and Basle as well as in the north Breisgau district, in and around Emmendingen as well as in Waldkirch im Elztal and in Markgräflerland.

The focus is on local reporting in the areas of politics, business, culture, culinary and leisure time activities as well as sports; Der Sonntag also brings articles on non-regional topics from the areas of pop, music, lifestyle, film, TV and computers.

Der Sonntag is printed at Freiburger Druck GmbH & Co. KG by the waterless offset process on a KBA Cortina press and finished on a Ferag mailroom system. In addition to various prizes for outstanding quality, the printing plant was awarded an environmental prize for its exemplary ecological performance.

Freiburger Wochenbericht has been published since 1952 and is distributed on Wednesdays in a circulation of 113,500 copies free of charge to all accessible homes in Freiburg and environs.

Its topical local contents and regular service pages for the consumers make Freiburg Wochenbericht an attractive and reliable advertising vehicle.

Freiburger Wochenbericht was awarded a prize for its services to citizens and consumers by the German Advertising Newspapers' Association (BVDA) in Berlin. Freiburg Wochenbericht is not just a reader-friendly service newspaper, but includes outspoken commentaries. Local information, calendar of events, "Freiburg privat", the local illustrated celebrity column, lots of entertainment news and reports from the business world and detailed sports news for Freiburg – everything can be found in its regular place every week.

According to the jury, these constitute ideal conditions both for commercial advertisers and private advertisers.

Freiburger Wochenbericht is printed by Freiburger Druck GmbH & Co. KG on a waterless KBA Cortina and finished on Ferag mail-room equipment.

The Freiburg printing company has received several awards in the past for outstanding printing quality and dedication to protecting the environment.

Heilbronner Stimme GmbH & Co. KG

Heilbronner Stimme

Category 1: Coldset-offset printing on newsprint
Printing site: Heilbronn, Germany

“Firmly anchored in the region – informed on a worldwide scale!” is the motto of the Heilbronner Stimme. The company is family-owned and was founded in 1946 by Paul H. Distelbarth and Hermann Schwerdtfeger. Today, Tilmann Distelbarth leads the media company in the third generation as publisher and CEO. Another chief executive is Bernd Herzberger.

At the heart of the company is the daily newspaper with its full-blown editorial department. It is published Monday to Saturday with a daily distributed circulation of about 92,000 copies. A total of nine different editions for the city and region of Heilbronn as well as the Hohenloh region highlight the newspaper’s local competency. More than 281,000 readers daily consult their newspaper. Its well-ordered structure and design make it one of Germany’s most modern and reader-friendly regional newspapers as well as the most important advertising carrier for the region. With its subsidiaries Delta Medien Service Heilbronn, Werbung Marketing & Verlag in Bretten as well as Eppinger-Verlag in Schwäbisch Hall, the media company also publishes weekly newspapers and high-quality monthly magazines. The mail delivery service RegioMail also belongs to the group’s portfolio.

As an innovative media company, the company puts emphasis on marketing cross-media advertising and linking regional contents from print and online. The Internet portals www.stimme.de, www.stimmt.de, www.jobstimme.de, www.immostimme.de and an Internet TV channel www.stimme.tv complement the portfolio in the digital area. Besides the print version, the daily newspaper is available online as well as on the iPad.

A quality management team conducts continual quality controls. Detailed analyses of extensive testing and measuring series, combined with latest process technology, guarantee constant production optimisation. Regular investments in the digital workflow, IT as well as print and mail-room technology permit modern newspaper production in accordance with the most exacting quality demands.

Il Sole 24 ORE Spa – Editrice

Il Sole 24 Ore

Category 4: Extra category for newspaper printing

Printing site: Carsoli (AQ), Italy

Il Sole 24 Ore, the daily economic and financial newspaper, was established after the merger between Il Sole (1865) and 24 ORE (1946) in November 1965.

Il Sole 24 Ore today acts as a point of reference for the economic and financial world with over 50 publications, a vast network of correspondents, 28 offices in Italy, 6 international offices, 8 printing sites.

The group Il Sole 24 Ore is an integrated editorial system that exploits the potential of various forms of media to provide authoritative and up-to-the-minute economic, normative and financial information, always sensitive to the various needs of its users.

Over six million people per week use the Sole system via different media and channels: the daily newspaper, free press, press agency, professional and specialised publishing, training courses, seminars, conferences, radio, satellite television, on and off-line financial products and the Internet.

The daily newspaper Il Sole 24 Ore is one of the most prestigious publications in Italy, and one of the most widely read economic-financial newspapers in Europe with a daily circulation of 350,000, over 155,000 subscribers and more than 1.2 million readers. The paper provides a thorough and complete analysis of the facts and issues regarding politics, the economy, rules and regulations in Italian and international markets, and acts as a reference point for professionals, investors and families. The editorial content of the newspaper is enriched by weekly columns and sections, inserts and supplements.

J.D. Küster Nachf. + Presse-Druck GmbH & Co. KG

Neue Westfälische

Category 1: Coldset-offset printing on newsprint

Printing site: Bielefeld, Germany

Neue Westfälische is a regional daily newspaper for the area of East Westphalia-Lippe. More than 90 percent of its circulation is by subscription. Publisher is the Zeitungsverlag Neue Westfälische GmbH & Co. KG, Bielefeld.

Neue Westfälische was first published on 3 July 1967 and is the result of a merger between the Westfälische Zeitung and the Freie Presse. However, its origins go back as far as 1811, to the Öffentliche Anzeigen des Distriktes Bielefeld. Neue Westfälische is also a successor to the Volkswacht, a newspaper published from 1830 to 1933 in Bielefeld. Today's NW is published with 15 local editions.

Neue Westfälische shares editorial material with Lippische Landes-Zeitung, Detmold, and Haller Kreisblatt, Halle (Westf.) that take their jacket from Bielefeld. There is a cooperation agreement for advertising with the Mindener Tageblatt.

The majority shareholder in Neue Westfälische is Presse-Druck GmbH (57.5 %), that is in turn wholly owned by the SPD media holding company Deutsche Druck- und Verlagsgesellschaft. The newspaper is printed by its subsidiary, Küster-Pressdruck GmbH & Co. KG.

Besides the printed newspaper, Neue Westfälische communicated information also via its Internet presence nw-news.de as well as e-Paper and its participation in local radio stations in Ostwestfalen-Lippe (Radio Bielefeld, Radio Hochstift, Radio Gütersloh, Radio Herford, Radio Lippe, Radio Westfalica). The service centre for the local radio operations is the production company audio media service (ams) in which Neue Westfälische also has shares. Moreover, Neue Westfälische has a participation in the Pressefunk Nordrhein-Westfalen GmbH & Co. KG that is the majority shareholder in Radio NRW.

Since 2006, Neue Westfälische has a share in the regional mail delivery service, Regio Brieflogistik. Under this arrangement, the mail services uses the logistics of the Neue Westfälische to have the bulk of deliveries done by the newspaper carriers.

Journal Communications

Milwaukee Journal Sentinel

Category 1: Coldset-offset printing on newsprint

Printing site: Milwaukee (WI), USA

Journal Communications, Inc., headquartered in Milwaukee, Wisconsin, was founded in 1882. We are a diversified media company with operations in publishing, radio and television broadcasting and interactive media. We publish the Milwaukee Journal Sentinel, which serves as the only major daily newspaper for the Milwaukee metropolitan area. The Milwaukee Journal Sentinel is committed to producing a newspaper that reflects the ever-changing world and fulfills the needs of readers and advertisers. A new production facility with state-of-the-art printing equipment, which became operational in early 2003, will help ensure the continued reliability and growth of Wisconsin's largest newspaper in the 21st century.

Kasturi & Sons Ltd.

THE HINDU

Category 1: Coldset-offset printing on newsprint
Printing site: Coimbatore, India

The Hindu, one of India's national dailies in the English language, is 134 years old and has a circulation of over 1.4 million copies. Apart from this morning English daily, the group, owned by Kasturi and Sons Limited, publishes a business daily "The Hindu Business Line," a current affairs fortnightly "Frontline," and a sports weekly 'Sportstar.' Kasturi & Sons Ltd. uses 14 print centres, 12 of them its own and the other 2 on contract. The company employs 3600 people.

Headquartered in Chennai, The Hindu has been a pioneer, with several firsts to its credit in both technology and other areas of newspaper publishing; for example, ROP color (1940), using aircraft for distribution (1963-1978), facsimile system for full page transmission (1969), photo-composing (1980), full-page integration of text and graphics in page make up and remote imaging (1993), online edition (1995), semi-commercial printing of the newspaper (1999), computer-to-plate (2004), on-line stitching and trimming of semi-commercially printed products (2007).

The Hindu group boasts some 800 journalists, with nearly 600 of them working for The Hindu alone. It has a string of foreign correspondents from London to Beijing, who provide an Indian perspective to the developments there. The newspaper has a complicated structure of sub-regional editions. Together, there are over 40 separate versions of the newspaper every day, with changes in at least a couple of their pages. On an average, about 250 pages are produced every night.

The Hindu was launched in 1878 as part of India's freedom struggle and was taken over in 1905 by the family that now owns and runs the newspaper and the group. It has long-standing reputation for authenticity and credibility.

KHL Printing Co. Pte Ltd.

Asia Wall Street Journal

Category 1: Coldset-offset printing on newsprint
Printing site: Singapore

KHL Printing Co. Pte Ltd was established in 1978, expanded from an initial team of 8 persons to a conglomerate with more than 1000 employees. Being the largest privately own printing group in Singapore, KHL Printing is also a truly one-stop print solution provider.

It has 7 core products:

- 1) magazines and periodicals,
- 2) text books and telephone directories,
- 3) daily and weekly newspapers,
- 4) soft cover and hard cover coffee table books,
- 5) catalogues and brochures,
- 6) photobook production, and
- 7) big format printing (in-door and out-door).

All the above products are made possible by our in-house fleet of digital printing presses, sheetfed offset printing presses, heat-set and cold-set web offset printing presses, couple with finishing machines that includes saddle stitched machine, perfect binding machine, case bound, wire-o machine, newspaper inserting machine, enveloping and letter shopping machine, and supported by comprehensive range of pre-press software including pre-flight check, on-line approval and high quality digital proofs.

On newspaper printing, KHL Printing is proud to receive the award. Presently, KHL is printing two daily tabloids, TODAY and The Asian Wall Street Journal, with a combined daily quantity exceeds 300000 copies, 6 days a week. Beside two dailies, KHL is printing three weekly newspapers.

As a group, KHL Printing will continue to invest in human resources, technology and equipment, to meet the changing needs of media owners and to grow with them.

Kieler Zeitung GmbH & Co. Offsetdruck KG

Kieler Nachrichten

Category 1: Coldset-offset printing on newsprint
Printing site: Kiel, Germany

Kieler Nachrichten (KN) is the only daily newspaper published in Kiel, the main city in the German Federal State of Schleswig-Holstein. Publisher is the Kieler Zeitung Verlags und Druckerei KG-GmbH & Co. Together with its regional editions (Eckernförder Nachrichten, Holsteiner Zeitung, Kiel lokal, Ostholsteiner Zeitung, Segeberger Zeitung) it has a sold circulation of 101,428 copies.

The first KN edition was published on 3 April 1946 after a licence had been granted to the CDU party by the Allied powers. Later on the newspaper followed on the tradition of the Kieler Zeitung, founded in 1864, and the Kieler Neueste Nachrichten that had been founded in 1894.

Axel Springer AG held a 24.5 percent share in the publishing company up to February 2009, after which time it sold its share to the Madsack publishing company in Hanover. The SPD party has a 20.4 percent participation in the Madsack group through its media holding dd vg.

The Kieler Nachrichten newspaper building is located on Asmus-Bremer-Platz, between Holzenstrasse and the town hall. .

Kieler Nachrichten offers various free newsletters via the Internet.

Mannheimer Morgen Großdruckerei und Verlag GmbH

Mannheimer Morgen

Category 1: Coldset-offset printing on newsprint

Printing site: Mannheim, Germany

Mannheimer Morgen (MM) is a regional daily newspaper. Together with its daughter newspapers, it covers the entire Rhine-Neckar area. Its sold circulation, with the local editions Südhessen Morgen and Bergsträßer Anzeiger, is 77,333 copies. The Schwetzingener Zeitung edition achieves a sold circulation of 11,235 copies.

The main MM edition contains local news from Mannheim, Ludwigshafen and Heidelberg. The publishing house belongs to the Dr. Haas group that also has participations in the Radio Regenbogen and big FM radio stations. The publishing house and printing company is located in Mannheim-Wohlgelegen. Together with outside printing jobs, such as for Weinheimer Nachrichten, Odenwälder Zeitung as well as a part print-run of Financial Times Deutschland, a total of about 210,000 copies are printed daily.

In 1946 Eitel Freiherr von Schilling and Oskar Hörle were granted a licence by the US military authorities to publish a newspaper in Mannheim. Published initially under the title Der Morgen, it had to be changed very soon afterwards for patent reasons to Mannheimer Morgen.

In 1951, with the takeover of the Heidelberger Tageblatt that had been published since 1949, first attempts were made to extend the area of circulation. Two years later an edition of MM for Ludwigshafen was launched. Cooperation agreements were entered into subsequently with many small newspapers in North Baden, e.g. Fränkische Nachrichten, Wertheimer Tageblatt, Bad Mergentheimer Zeitung, Schwetzingener Zeitung, Hockenheimers Tageszeitung, Weinheimer Nachrichten and Odenwälder Zeitung. In 1967 the social democratic AZ in Mannheim was acquired.

In 1975 the printing plant was moved from the city centre to Wohlgelegen, followed by the newsroom in 2003. In 1997 BWK – an investment company in which the BW bank and Württembergische Versicherung have shares – acquired 34.9 percent of the Dr. Haas group.

Masar Printing and Publishing

Al Bayan

Category 1: Coldset-offset printing on newsprint
Printing site: DUBAI, United Arab Emirates

Al-Bayan Newspaper was established in Dubai at the beginning of 1980, the first issue of the newspaper was published on 10th of May 1980, with 100 people in the editing team that comprised an elite group of journalists from the Arab World. The newspaper started with 20 Heterogeneous pages. The budget that initiated the newspaper was 15 million dirhams.

Al-Bayan Newspaper joined Dubai Media Incorporated in September 2009 in a historical move. The main part of Al-Bayan consists of 40 pages, and there are also three daily supplements: A 20-page "Al-Iqtisaidi (Economy)", a 20-page "Arriyadi (Sport)" and a tabloid sized 24-page "Al-Hawas El-Khams" (Five Senses). There is also a weekly supplement called "Masarat (Orbits)" that consists of 48 tabloid pages and covers topics in culture, literature and the latest of publications and books.

In 1998, Al-Bayan started electronic publishing. In 2003, Al-Bayan launched its electronic version and in the same year, it launched the SMS service. Al-Bayan also was the first newspaper to launch the service of the classified advertisements in the Arab World through SMS, and that helped raise its revenues and made 10 % increase in the number of visitors to the website. Circulation increased 33 % as well, with the adoption of a new circulation strategy and now the newspaper is circulated in a number of Arab and Gulf States as well as in London, Paris, Bangkok, and soon it will be distributed in Australia and Germany. A large subscription campaign has been run which contributed in a 60 % increase in number of subscribers.

Al-Bayan Newspaper achieved a good growth in terms of circulation which helped in decreasing the returned papers to 45 % compared to 2009. Al-Bayan's income has risen 7 % since joining the DMI. Al-Bayan is run now by a highly trained and qualified national team led by Dhaen Shahin, who joined the newspaper in 1984. As a member of DMI, Al-Bayan is printed at "MASAR Printing & Publishing", the leading high quality printing & publishing. MASAR's Man Roland Cromoman 70 semi commercial is set up with 4 heatset and 12 coldset towers. It houses four dryers and after burners plus three state-of-the art folder units to cater for folding flexibly according to the job with staggering speed of 70,000 cph.

Emarat Al Youm

Category 1: Coldset-offset printing on newsprint
Printing site: DUBAI, United Arab Emirates

Emarat Al Youm is a tabloid newspaper, its first issue was published on September 13, 2005, the newspaper overall content focuses on the news and issues of interest to readers in the UAE, particularly local citizens; as part of a policy of commitment to professionalism based on accuracy, steadiness and consistency, determined at the same time, to meet the requirements of knowledge and thoughtful entertainment for our readers.. Emarat Al Youm attracts attention of Arab readers in the UAE by focusing on different aspects of their lives and concerns, through daily sections dedicated to them in the newspaper, besides, the newspaper promotes the cultural products of the UAE and its achievements in economy and learning, and exposes stories of success and excellence, away from exaggeration or dramatization.

Emarat Al Youm observes the community's activity in the country in general and Dubai in particular, and the creation of spaces for dialogue and interaction in the newspaper, or through its website, Emarat Al Youm gives stories of human aspect, business and social inquiries larger spaces, while omitting official topics and protocol or reducing them to the minimum.

Emarat Al Youm invests margins of the freedom of expression in the UAE, and in Dubai, seeking to improve content and enhance its credibility through exhibiting opinions and ideas in a neutral and accurate way, taking into consideration the social responsibility, so that our product doesn't affect the reader's right to acquire knowledge, and cause no harm to the reputation of the UAE or its people. Emarat Al Youm has won many awards including an international award of info graphics. In addition, the newspaper offers a classified service to its readers seven days a week. It is ranked the first newspaper in terms of browsing the web on Google, and second in terms of number of readers in the UAE.

Emarath Al Youm is run by a qualified team of journalists led by Sami Al Reyami, the Editor-in-Chief.

As a member of DMI, Emarath Al Youm is printed at MASAR Printing & Publishing, the leading high quality printing & publishing house in the region specialized in newspaper and commercial print applications. Masar's manroland Cromoman 70 semi-commercial is set up with 4 heat-set and 12 coldset towers. It houses four dryers and after burners plus three state-of-the art folder units to cater for folding flexibly according to the job with staggering speed of 70,000 cph.

Mediacorp Press Ltd.

TODAY

Category 1: Coldset-offset printing on newsprint
Printing site: Singapore

Vision: To be Asia's top media company
Mission: Delivering valued content to the world

MediaCorp is Singapore's leading media company with the most complete range of platforms, spanning television, radio, newspapers, magazines, movies, digital and out-of-home media.

It pioneered the development of Singapore's broadcasting industry, with the broadcast of Radio in 1936 and Television in 1963. Today, MediaCorp has over 50 products and brands in four languages (English, Mandarin, Malay and Tamil), reaching out to all adults in Singapore every week.

Initiatives in the new digital space include Internet TV-on-demand, High Definition TV broadcast and Over-the-Top (OTT) interactive services.

Beyond Singapore, MediaCorp is an active regional player through co-productions in TV dramas and movies, magazines publishing, as well as Channel NewsAsia International, one of the first Asian-owned English news channels.

Winner of numerous international awards and accolades including Asian Television Awards' Terrestrial Broadcaster of the Year, MediaCorp's vision is to become Asia's top media company, delivering valued content to the world.

TODAY

The nation's second most-read newspaper, TODAY offers busy working people quality content in a convenient, compact format. An unrivalled package of the top local and international news, it covers news reports on key issues through insightful and often provocative commentaries. With weekend editions as well, TODAY, TODAY on Saturday and TODAY on Sunday are distributed free-of-charge.

Nanyang Press Holdings Bhd

NANYANG SIANG PAU

Category 1: Coldset-offset printing on newsprint
Printing site: Kuala Lumpur, Malaysia

Nanyang Siang Pau was started in 1923 as a paper to keep Chinese businessmen updated with commodity prices. Through the years it evolved into a general mainstream paper but was repositioned in November 2010 to be a general paper that focuses on economic news. Its target readers are the professionals, managers and business community. Its repositioning has been well received by both its readers and advertisers.

Neue Luzerner Zeitung AG

Neue Luzerner Zeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Adligenswil, Switzerland

269,000 readers throughout Central Switzerland get their news daily from the Neue Luzerner Zeitung or one of its regional editions. Since September 2008, the Sunday "Zentralschweiz am Sonntag" has been published and is highly popular among both readers and advertisers. The Neue Luzerner Zeitung AG publishes the following daily newspapers: Neue Luzerner Zeitung, Neue Urner Zeitung, Neue Schwyzer Zeitung, Neue Obwaldner Zeitung, Neue Nidwaldner Zeitung and Neue Zuger Zeitung. In addition, published on a weekly basis are REGION as well as the free titles Zuger Presse and Zugerbieter. The Neue Luzerner Zeitung consists of four sections that focus especially on regional news, business, sport and culture. Various supplements complement the offering: SportJournal on Tuesday, APERO leisure time magazine on Wednesday together with the TV programme schedule. The Friday edition includes a supplement containing background information on a topical subject as well as the leading job ads guide for Central Switzerland. Neue Luzerner Zeitung can be subscribed to also as an e-Paper version. Zisch.ch is the online portal of the Neue Luzerner Zeitung AG and its regional editions; it is designed especially with Central Switzerland in mind. Besides regional news, it offers a wide-range of information and services. With 5.2 million page retrievals monthly, zisch.ch also offers an interesting and attractive advertising platform. Newspapers are printed also for customers at the Luzerner Druck- Zentrum of the Neue Luzerner Zeitung AG in Adligenswil on modern, high-capacity CTP, printing and mailroom systems. Radio Pilatus, the leading private radio station in Central Switzerland, and Tele 1, the TV station for Central Switzerland that went on the air on 1 February 2010, complete the LZ media portfolio.

NZZ Print

Neue Zürcher Zeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Schlieren, Switzerland

As a liberal-conservative newspaper with a 230-year tradition, the “Neue Zürcher Zeitung” acts as a leading opinion-former in the Swiss media market. Its worldwide network of correspondents, a highly respected business section, strong national reporting and multifaceted features section make NZZ a quality newspaper with international fl air. The successful Monday magazine “NZZ Folio”, published for the first time in August 1991, regular special supplements as well as the Sunday “NZZ am Sonntag” launched in 2002 extend the range of topics covered. NZZ is the flagship of the NZZ media group, to which other newspaper publishing houses and printing plants as well as a prominent book publishing house also belong. The company plays an important role also in electronic media: it produces TV programmes under the brand name “NZZ Format” that are broadcast in Switzerland and in Germany, while “NZZ Online” offers continually updated news as well as a wide range of services in the Internet. For 218 years, printing of the “Neue Zürcher Zeitung” was done at the main location in Zurich. The growing circulation made it necessary in 1988 to move to a new printing centre in Schlieren that was then extended in 2004. Today, NZZ Print presents itself as a strong and quality-conscious partner for all newspaper products.

NZZ am Sonntag

Category 1: Coldset-offset printing on newsprint
Printing site: Schlieren, Switzerland

With the publication of the Sunday “NZZ am Sonntag” for the first time on 17 March 2002, NZZ responded to readers needs on the weekend with its customary credibility and competence. The Sunday edition offers not just reports, analyses, comments and background reports on current events, but also articles about developments in society, cultural trends, entertaining features and columns. The magazine “Z”, published eight times annually, complements the weekend editions with an offering of articles on lifestyle. With its average circulation of more than 128,000 copies, “NZZ am Sonntag” reaches more than 500,000 readers weekly. Printing is done in the printing centre in Schlieren that was extended in 2004. NZZ Print presents itself as a strong and quality-conscious partner for all newspaper products.

Nieuwsdruk Limburg BV

Weekend GEZET

Category 1: Coldset-offset printing on newsprint
Printing site: Limburg, Netherlands

Nieuwsdruk Limburg is a Dutch professional printing firm which has been serving clients in Limburg, in Holland and even worldwide for more than 10 years in the production of newspapers, magazines, catalogues and much more.

Being the printing plant for the Limburg Media Group, Nieuwsdruk Limburg delivers quality on a daily basis by printing Limburg's biggest newspapers Dagblad de Limburger and Limburgs Dagblad (with a reach of more than 500,000). Both Limburg Media Group, part of the British Mecom Group, and Nieuwsdruk Limburg are situated in the southern part of Holland, in the province of Limburg. Excellent infrastructure makes sure that Limburg can be easily accessed and big cities such as Brussels, Frankfurt and Eindhoven are never far away.

Besides printing Limburg's biggest newspapers, Nieuwsdruk Limburg is also responsible for various regional, national and even international titles (in total more than 4,000,000). One of the Limburg Media Group titles is WeekendGezet, a weekly freesheet (tabloid) with a circulation of 456,000 in 5 editions, and still growing. WeekendGezet is a full colour, crisp, magazine-like mix of editorial and advertorial content that focusses on culture, lifestyle, living, gardening, beauty, personal care and more. Important within the WeekendGezet philosophy is the possibility for their customers to decide how the advertorial content is placed.

Nieuwsdruk Limburg uses state of the art professional quality commercial printing equipment. Therefore it takes great pride in providing customers with the best possible quality.

Prensa Libre S.A.

PRENSA LIBRE

Category 1: Coldset-offset printing on newsprint

Printing site: Guatemala, Guatemala

Prensa Libre was born on 19 August 1951, under the vision of five Guatemalan journalists. It was dedicated to the truth and aimed to offer independent, honest and worthy journalism.

Prensa Libre reaches 1.4 million persons daily, making it the most-read written medium in the country. It employs a team of professionals to collect and prepare the news stories for presentation on different media in line with the highest standards of quality. Its print edition reaches 815,130 persons daily and has been certified according to ISO 12647-3, thus gaining membership in the club of the world's best printers since 2010

Due to its history and what it means for the country, Prensa Libre is the reference for all Guatemalans.

Augsburger Allgemeine

Category 1: Coldset-offset printing on newsprint

Printing site: Augsburg, Germany

Pressedruck media group: From newspaper house to media company.

A licence to publish a daily newspaper was granted on 30th October 1945. On that same day, the first edition of the Schwäbische Landeszeitung was published in Augsburg. Some 14 years later, in 1959, this became the Augsburgischer Allgemeine.

At the beginning of the 1960s and following the cooperation agreement in 1968 with the Allgäuer Zeitungsverlag (AZV), Kempten, the newspaper's area of distribution was extended to cover the entire Bavarian-Swabian region. The Augsburgischer Allgemeine, with its many local editions, is now one of the largest German daily newspapers.

In a parallel development, the newspaper and publishing house has become one of the leading media service providers in South Germany, namely the Pressedruck media group. The newspaper is the flagship, with radio and TV productions, a call centre, Internet and logistics services as well as an extensive printing and publishing programme completing the group's offering.

Customers can thus be offered cross-media packages.

The wholly family-owned company is also very active in the social field. Publisher Ellinor Holland established "Kartei der Not", the media group's fund that has collected more than EUR 34 million in donations to help alleviate poverty in the region.

Pressehaus Stuttgart Druck GmbH

Stuttgarter Zeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Stuttgart, Germany

At Pressehaus Stuttgart Druck GmbH several daily newspapers and weekly publications of the Zeitungsgruppe Stuttgart as well as various print products for publishing houses, industry and commercial businesses are produced. With the Stuttgarter Zeitung, we are responsible for printing one of the major German-language regional newspapers that offers high-quality national content.

We also serve numerous publishing customers and, besides many other daily newspapers and weekly publications, also produce customer, association, exhibition and corporate newsletters. Our portfolio additionally includes magazines and programme catalogues as well as industry catalogues for the car sector, magazines or advertising inserts. Besides the Stuttgarter Zeitung and Stuttgarter Nachrichten, Pressehaus Stuttgart Druck GmbH also prints the Stuttgarter Wochenblatt, one of Germany's oldest freesheets. Naturally, we apply the same high standards with which we produce our newspaper products also to the many different print objects we produce outside of the traditional newspaper. Consequently, local publishers as well as major international groups entrust us with the production and distribution of internal newsletters. Whether newspaper or magazine, programme catalogue or advertising insert, special interest or industry catalogue: our attention to detail, flexibility and performance capacity convince.

Rheinisch-Bergische Druckerei GmbH & Co. KG

Rheinische Post

Category 1: Coldset-offset printing on newsprint

Printing site: Düsseldorf, Germany

Rheinisch-Bergische Druckerei GmbH & Co. KG, based in Düsseldorf Heerdt, is a subsidiary of the Rheinische Post media group. The printing centre in Düsseldorf is equipped with the latest offset technology in the shape of the KBA Commander, which was installed in 2001 and continuously extended up to 2007. In June 2010 the printing capacity was again increased with two new 32-page Cortina compact rotary presses added to the machine pool. As such, the operation now has 14 printing units in 4/2 technology and 6 folders.

The Cortina technology for waterless offset printing not only facilitates high print quality with a 70 l/cm screen, but is also format-variable, meaning that printed products can now be printed in both broadsheet and tabloid format. Six MSD inserting lines (12-in-1) from Ferag are available in the mailroom for preparation of the printed products, which are buffered in an automatic interim store (CTI/Ferag) and then sent out to the dispatch lines. A seventh RSD inserting line (also 12-in-1) rounds off the insertion capacity.

Two of the inserting lines are equipped with Ferag technology for stitching and trimming, also allowing magazine formats to be produced alongside the classic broadsheet and tabloid formats. A "Stream Folder" from Ferag for production of a third fold rounds off the wide processing potential of the dispatch room. Modern system environments from EAE/ABB/Swisslog/KBA and Ferag enable a largely automated production process with the aforementioned printing and mailroom systems.

Coupled with this equipment, the skills of around 200 specialist personnel and engineers mean that we can offer our customers a diverse product range that many classic newspaper printers would often shy away from. An average of 380,000 copies of the Rheinische Post newspaper leave our print shop every day, reaching around 1.1 million readers. In addition, we also produce approximately 4 million copies every week, including publications for free newspaper customers, other publishing houses and advertisers. We are equally at home supporting printshop customers with run lengths of 10,000 copies and those with run lengths of 500,000 copies and more. We would be happy to discuss your product ideas with you. You will be amazed by the many product options and attractive print and finishing prices we can offer! Rheinpfalz Verlag und Druckerei GmbH & Co. KG

Die Rheinpfalz

Category 1: Coldset-offset printing on newsprint

Printing site: Ludwigshafen, Germany

Die Rheinpfalz is the regional daily newspaper for the federal state of Palatinate. Distributed circulation: 242,660 copies daily (source: Audit Bureau of Circulation, first quarter 2012). Die Rheinpfalz reaches more than 690,000 readers daily, or 58 percent of population over 14 years of age.

The decentrally organised publishing house today consists of 14 local editorial offices, four business offices and about 75 service points. Nearly 5000 Journalists, photographers, correspondents, publishing house staff, printing specialists and carriers provide Die Rheinpfalz readers with their morning news on seven days per week.

Ringier Print Adligenswil AG

Blick

Category 1: Coldset-offset printing on newsprint
Printing site: Adligenswil, Switzerland

“Blick” is Switzerland’s best-selling newspaper. The first and only Swiss popular newspaper sets the agenda and forms opinion. “Blick” is published in a daily print run of 267,000 copies. Its tabloid Sunday edition, SonntagsBlick, has a circulation of 300,000 copies. Colourful and entertaining, the largest Swiss Sunday newspaper gives extensive, close-up coverage of politics, business, society and sports.

Ringier Print ensures that more than one million Swiss can read their favourite newspaper at the breakfast table. Besides the Ringier newspapers “Blick”, “SonntagsBlick” and “Blick am Abend”, 290 personnel produce additional daily, weekly, trade, association and customer newspapers as well as newspaper-type objects, such as advertising supplements.

Five WIFAG web offset presses output up to 205,000 copies per hour. The mailroom and distribution logistics supply more than 60 newspaper titles to various distribution networks for distribution throughout the country.

With its investments in 2009 in state-of-the-art newspaper printing and finishing equipment, Ringier Print has secured its leading market position.

Ringier Print’s creative specialists and modern technology satisfy all prepress requirements. From the taking over of outside data to electronic text and image processing, design, page layout and proofing, up to Computer-to-Plate, Ringier Print satisfies all needs.

Customer support for image processing is of vital importance, as the quality in print is largely determined by the shooting and post-treatment of the images. With the editorial system OpenEDITOR and via web browser, Ringier Print also permits its customers, wherever they are, to fill their newspaper with contents. The OpenEDITOR plus makes the editorial system the central instrument for all online and offline channels.

With the certified management system ISO 9001 for quality and ISO 14001 for the environment, Ringier Print emphasises its objective to achieve continuous quality optimisation and environment-friendly production. Certification in accordance with the principles and criteria of Forest Stewardship Council A.C. enables the use of paper containing at least 30 % fibres from responsibly managed forestry. Since 2011, Ringier Print has been certified for climate-neutral print products.

“myclimate” as a partner guarantees the efficient use of resources in high-quality environmental projects.

Saarbrücker Zeitung Verlag und Druckerei GmbH

Saarbrücker Zeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Saarbrücken, Germany

Saarbrücker Zeitung is the leading regional daily newspaper in the Saarland area and can trace its roots back to the year 1761. With an average circulation of 152,000 copies, the SZ is published daily, except Sunday, in 12 local editions and is read by some 480,000 persons. As the only regional subscription newspaper in the Saarland area, the SZ is published Monday to Thursday with an average page count of 32, and on Friday and Saturday with 80 Pages (including preprints). Since October 2004, Saarbrücker Zeitung has been produced strictly in accordance with the conditions of the ISO newspaper printing standard.

Since 2011 the Saarbrücker Zeitung group has been using a highly integrated SAP CRM system for all daily newspapers belonging to the SZ group.

Editorial production is done using the CCI NewsDesk system. For advertising, the SAP-IS-M/AM is used in combination with the PPI planning and production components. Plate production is done via PPI PrintNetOM on two Krause LS Jet 250 systems, with automatic plate punching and bending carried out on 2B and Nela units.

Since September 2006 the SZ has been published in the Rhinish format and printed on two manroland Colorman presses equipped with 9-couple satellite units. The installation is equipped with ribbon and section stitcher as well as a Comcard card gluing system. This permits collect production of up to 64 full-color pages.

Since July 2012 the Saarbrücker Zeitung has been produced on two new Ferag lines capable of inserting up to 26 objects in a single run. This new installation made it possible to process daily newspapers, weekly titles and direct mail media in one mailroom. More than 600 million inserts are processed annually. Higher quality inserts and print products are produced via a cutting- and a stitching-drum.

Sanomala Oy

Helsingin Sanomat

Category 1: Coldset-offset printing on newsprint

Printing site: Vantaa, Finland

Sanoma is a strong European media and learning company operating in diverse fields of media and learning in over 20 countries. Sanoma is the leading media group in Finland and the Netherlands and has strong position in Belgium. In 2011, almost 11,000 people worked in the Sanoma Group and the Group's restated net sales were 2,378 million euros.

Sanoma News is the leading newspaper publisher in Finland, and its products have a strong presence both in print and digital format in the lives of their readers. In addition to Helsingin Sanomat, the largest daily in the Nordic region, Sanoma News publishes national and regional newspapers and is also a significant digital player in Finland.

Helsingin Sanomat is the largest subscription-based newspaper in the Nordic region. Founded in 1904, in the footsteps of predecessor, Päivälehti (1889 to 1904), Helsingin Sanomat has been Finland's largest paper since the early 20th century. Helsingin Sanomat has a circulation of more than 400,000 and nearly one million daily readers and is the leading advertising medium in Finland. In addition to the daily newspaper, Helsingin Sanomat incorporates the monthly magazine Kuukausiliite, the weekly supplement NYT as well as the quarterly magazine HS Teema. HS.fi, the Helsingin Sanomat online service, is among the most popular online services in Finland. In the autumn of 2010, Helsingin Sanomat became the first Finnish newspaper to publish an iPad version. The products in the Helsingin Sanomat media family reach a total of 1.9 million readers.

Sanoma News prints its main newspapers at five locations. Sanomala in Greater Helsinki covers half of Sanomapaino's production and is one of Europe's largest newspaper plants. Sanomala's operations cover digital asset management, five CTP lines, two double folders and 13 printing towers (press line), five mailing lines and two bundle sorters (mailroom), Sanomala employs about 200 people and has a yearly production of about 200 million mailed copies.

Sanomapaino's other printing plants are located in Forssa, Varkaus, Kouvola and Lappeenranta. Sanomapaino is the biggest newspaper printer in Finland with over 400 employees. Yearly printed copies reach almost 760 million and newsprint consumed 72,000 metric tons. Sanomapaino produces over 100 different titles.

SDZ Druck und Medien GmbH & Co. KG

Schwäbische Post

Category 1: Coldset-offset printing on newsprint

Printing site: Aalen, Germany

SDZ Druck und Medien is a company with 320 employees. The company's activities are as follows:

- daily and weekly newspaper publishing
- media services
- data management and computing centre
- SDZeCOM digital media services
- digital printing and printing services

The Schwäbische Post is a regional daily newspaper with a circulation of about 27,000 copies. In 1965 it became one of the first daily newspapers in Germany to be printed by web offset color printing. Modern editorial and layout programs are used for the complete production of editorial and advertising pages.

Multiple use is made of text and image data, including the company's electronic media.

The prepress department is among the pioneers of computer-controlled text processing, and since 1990 has been organised to operate with digital workflows up to CTP. Digital image recording and image processing, colour management and output-neutral image data handling up to the image database, with automatic integration into page documents and external access possibilities, are features of the prepress sector of the SDZeCOM digital media service provider.

State-of-the-art digital tools and production equipment, and benchmarking of the participation in the International Newspaper Color Quality Club competition are the logical consequence of an innovative, quality-oriented corporate philosophy.

GUANG MING DAILY

Category 1: Coldset-offset printing on newsprint
Printing site: Petaling Jaya, Selangor, Malaysia

Guang Ming Daily is the leading Chinese daily in the Northern Region of Peninsula Malaysia.

It boasts a daily circulation of approximately 120,000 copies. Guang Ming Daily has two different editions namely the Northern Region edition and the Central Region edition. It is a paper that not only gives its readers the latest news but also focuses on family and social issues. Hence, it is no surprise that this paper is widely read by women. This paper is also well-known for its entertainment and sports news.

Guang Ming Daily was started in 1987 and became a publication of Sin Chew Media Corporation Berhad in 2004.

The paper is printed on Goss Universal with a configuration consisting of eight towers 4 high printing unit of 711 mm web width capable of printing 32 pages broadsheet full colour at a maximum speed of 50,000 copies per hour. The pressroom has three such line of Goss Universal machine.

SIN CHEW DAILY

Category 1: Coldset-offset printing on newsprint
Printing site: Petaling Jaya, Selangor, Malaysia

Sin Chew Daily is the largest-circulation Chinese daily in Malaysia with a daily average circulation of approximately 404,000 copies.

Since its inception in 1929, it has gone through many trials and tribulations to become a credible mainstream daily respected by many for its independent stance on current issues.

It is a paper that caters for all with contents spanning from latest updated news, thought-provoking opinions, business news, fashion, entertainment, sports and others.

Sin Chew Daily is the flagship publication of Sin Chew Media Corporation Berhad which is a subsidiary of Media Chinese International Limited, one of the largest Chinese media publisher outside China and Taiwan.

The paper is printed on a Goss Universal press with a configuration consisting of eight, four-high towers for 711mm web width capable of printing 32 pages broadsheet full colour at a maximum speed of 50,000 copies per hour. The pressroom has three such Goss Universal lines.

The Straits Times

Category 1: Coldset-offset printing on newsprint

Printing site: Singapore

The Straits Times, the English flagship daily of SPH, has been serving readers for more than a century. Launched on July 15, 1845, its comprehensive coverage of world news, East Asian news, Southeast Asian news, home news, sports news, financial news and lifestyle updates makes The Straits Times the most-read newspaper in Singapore.

Quality news, in-depth analyses, powerful commentaries and breaking stories are packaged to give readers riveting accounts of events in Singapore, the region, and beyond.

The Straits Times' key strength lies in its world class coverage of news outside Singapore. With 20 bureaus in major cities around the world, The Straits Times correspondents bring world news to readers on a Singapore platter, helping them appreciate world events from a Singaporean perspective.

In keeping with the times, The Straits Times introduced weekly supplements such as Digital Life (DL), Urban and Mind Your Body (MYB) to complement The Straits Times as well as IN and Little Red Dot to cater to young readers in schools. This year (2010), IN won the World Young Reader prize for the Newspapers In Education category. The prize was awarded by the World Association of Newspapers and News Publishers (WAN-IFRA).

The Straits Times also has an online presence at www.straitstimes.com. The site features top stories, blogs and an online forum threads. Also under The Straits Times' umbrella are citizen journalism site Stomp and online television service RazorTV.

Lianhe Zaobao

Category 1: Coldset-offset printing on newsprint
Printing site: Singapore

Lianhe Zaobao is the flagship Chinese daily in Singapore, established since March 16, 1983, following the merger of two established Chinese newspapers, Nanyang Siang Pau and Sin Chew Jit Poh, which date back to 1923 and 1929 respectively. With its long history, Lianhe Zaobao is the most-read Chinese newspaper in Singapore and a trusted information source for the Chinese-speaking community.

The only Chinese morning daily in Singapore, Lianhe Zaobao is an influential and authoritative newspaper giving valuable insights into local and foreign news. Lianhe Zaobao is also regarded as an important source of political and economic news on East Asia, especially China.

With an extensive network of correspondents in Beijing, Chong qing, Shanghai, Guangzhou, Hong Kong, Taipei, Seoul and Tokyo, and experienced stringers in the Philippines, Japan, Europe and America, Lianhe Zaobao is able to give readers timely and in-depth coverage of significant events taking place in the region and beyond.

Besides Singapore, Lianhe Zaobao is circulated in Indonesia, Brunei, Hong Kong, Vietnam and major cities of China like Beijing and Shanghai.

St. Galler Tagblatt AG

St. Galler Tagblatt

Category 1: Coldset-offset printing on newsprint
Printing site: Druckzentrum Winkeln, Switzerland

St. Galler Tagblatt AG is the leading media company in eastern Switzerland. Every day the personnel at Tagblatt Medien is engaged in the acquisition, selection, treatment and distribution of information in printing and electronic form.

The most important product is the St. Galler Tagblatt which is published in seven regional editions. In addition, numerous other titles are produced, both as own publications as well as on a contract basis for customers from all over Switzerland.

Tagblatt Medien reaches its community also in electronic distribution, reaching viewers and listeners throughout eastern Switzerland with "Tele Ostschweiz". Naturally, the news content can be accessed also in the Internet under www.tagblattmedien.ch.

The Coopzeitung is printed on a contract basis for Coop, one of the biggest retailing groups in Switzerland, at the St. Galler Tagblatt AG printing centre in Winkeln. With more than three million readers, it is the highest-circulation newspaper in Switzerland.

The newspapers are produced on a WIFAG OF 470 press, six 4/4 printing towers, seven reels, two 2.5.5 folders and the ABB Press Master System. Thermal News plates are produced on two new Kodak Generation News CTP imagesetters and the 2B-precision plate processing system. The page data in PDF format are processed in a largely automated operation by the AGFA Arkitex workflow management system.

Südostschweiz Partner AG

Die Südostschweiz

Category 1: Coldset-offset printing on newsprint
Printing site: Haag, Switzerland

The Südostschweiz Partner AG (SOPAG) was founded 2004 in Haag, Switzerland. The SOPAG is the print location for several newspapers from the Cantons St. Gallen, Graubünden, Glarus and Principality of Liechtenstein.

Five separate and independent companies are involved in the Südostschweiz Partner AG: Südostschweiz Presse und Print AG from Chur (CH), Sarganserländer Druck AG from Mels (CH), Buchs Medien AG from Buchs (CH), Vaduzer Medienhaus AG from Vaduz (FL) and Rheintal Verlag AG from Berneck (CH). Each publisher holds a 20 % share in the capital of the company.

The SOPAG prints more than 1.7 billion pages per year and has more than 250,000 readers in the region of south-east Switzerland. SOPAG was the first company worldwide to win with a retrofit print unit the INCQC 2010.

Like all over the world, electronic media are on the rise. Considering this development, it is therefore very important to have not only quality content but also a very good print standardisation and print quality in-house.

Tages-Anzeiger

Category 1: Coldset-offset printing on newsprint
Printing site: Zurich, Switzerland

Tages-Anzeiger is the leading quality title in the region of Zurich and one of the leading newspapers in German-speaking Switzerland. The first edition was published on 2nd March 1893. Since then, it has developed progressively to become the market leader, with a well-educated and professionally very successful readership.

The importance of Zurich as a business and cultural centre for Switzerland gives the Tages-Anzeiger a national character. Launched already with a long print run, the Swiss media research organisation (WEMF) statistics for 2011 list exactly 195,618 copies, while the MACH Basic study for 2011–2012 shows exactly 508,000 readers.

Category 1: Coldset-offset printing on newsprint
Printing site: Ludwigsburg, Germany

Since it was established in 1818, the Ungeheuer + Ulmer company has developed from printer to the royal court to a modern media house. Its some 200 personnel are based in the centre of Ludwigsburg, where they produce both in web (newspapers, inserts) and in sheet-fed (leaflets, magazines, business reports) printing. The company's offering ranges from concept development, editing and design up to printing, finishing and mailing.

The Ludwigsburger Kreiszeitung (LKZ), with its regional edition Neckar- und Enzboten, is published by Ungeheuer + Ulmer and celebrates its 195th anniversary in 2012, making it the oldest independent regional newspaper in Baden-Württemberg. It is the highest-circulation daily newspaper in the Ludwigsburg area and, together with its six regional editions and full newsroom, covers the news in 39 localities, in Baden-Württemberg, Germany and the world. It has a print circulation of 42,206 copies. With its relaunch on 26. April 2012, the publishing house and newsroom reacted to changed reader behaviour with a modernised design and printing technology. The newspaper redesign was followed directly by a modernised Internet site www.lkz.de.

Ungeheuer + Ulmer has also gained a reputation for organising popular regional exhibitions. From the newspaper to commercial printing, up to services and events, the company motto is "all from a single source".

United Printing & Publishing

7Days

Category 1: Coldset-offset printing on newsprint

Printing site: Shahama, Abu Dhabi, United Arab Emirates

7DAYS, the most popular free daily tabloid newspaper in the United Arab Emirates (UAE), was launched in April 2003 as a weekly newspaper. The following year it increased its frequency to six days a week (Sunday – Friday). With an unrivalled reach, 7DAYS has a daily readership in excess of 200,000 adults. Wholly owned by the UK based Daily Mail & General Trust Plc (DMGT), 7DAYS is part of an impressive media portfolio that includes UK Metro, the world's biggest circulating free daily newspaper.

7DAYS is printed at "United Printing & Publishing" (UPP), the leading high quality printing and publishing company of the region. UPP is an ISO 9001, ISO 14001, ISO 18001 Certified Company. It started up in 2006 as the Emirates Media Inc., established in early 70's as a part of the prestigious ADMC (Abu Dhabi Media Company) headquartered in Abu Dhabi, UAE, and has become the largest commercial as well as newspaper printing company in the UAE.

With a complete and vast array of equipment and a work force in excess of 600, our infrastructure allows us to offer competitive prices, quick delivery times to suit all requirements. UPP specialises in jobs such as newspaper printing, magazines, brochures, point of sales products, books, dictionaries, newsletters and marketing collaterals. UPP also have digital machines for small run jobs and outdoor equipment for billboards, POS etc. Our web machines include KBA Continent, Orient, Hi-line, KBA 213, commercial web machines KBA 215 and Manroland Rotoman machine capable of 50,000 impressions per hour. Our sheet-fed machines include two 8 colour perfecting presses, one 6 colour press, three 5 colour presses and two 4 colour presses. The state-of-art binding lines include four perfect binding machines and three saddle stitching machines with 8 stations capable of producing up to 20,000 books/magazines per hour.

The KBA Continent is equipped with 2 heatset towers, 10 coldset towers, two folders, 16 reelsstands and double deck balloon formers, which can print up to 48 pages in four colours with an output of 50,000 cph, providing customers with different flexible options. The newspaper printing presses are integrated with mailroom equipments from Muller Martini having 6 stackers with 11 online strapping machines connected to a common delivery ramp with 2 film wrapping machines. The entire mailroom setup is also integrated with 3 online/offline SLS 3000 inserting machines, each with 6 stream feeders and three lines of MPC (Mailroom Production Control) bundle labeling systems, we also have card gluing Value Liner machine duly integrated with one of the SLS 3000 inserters.

The National

Category 2: Heatset-offset or UV-cured printing on newsprint
Printing site: Abu Dhabi, United Arab Emirates

The National, the Abu Dhabi Media Company's first English-language publication, has set a new standard of quality English-language journalism in the Middle East.

Launched in April 2008, The National sought to establish an institution on par with some of the greatest newspapers in the world, but with the authenticity of a paper made in the UAE. With more than 250 journalists based in the country's seven emirates and in foreign bureaux throughout the world, The National tells the story of the Middle East as seen through the region's eyes. Focused on the capital, Abu Dhabi, but anchored in the new social and political reality that is the emerging nation within a fast-changing global context, The National offers fresh, compelling content that's made in the UAE.

In 2010 The National launched a range of new internet and mobile products and services, a significant step on its evolution into a multi-platform news organisation.

THE NATIONAL is printed at "United Printing & Publishing" (UPP), the leading high quality printing and publishing company of the region.

United Printing and Publishing (UPP) is an ISO 9001, ISO 14001, ISO 18001 Certified Company, has become one of the largest companies in UAE with the state of the art printing facility situated in Abu Dhabi. UPP was started in year 2006 previously known as the Emirates Media Inc., established in early 70's as a part of the prestigious ADMC (Abu Dhabi Media Company) headquartered in Abu Dhabi, UAE and has become the largest commercial as well as newspaper print company in the UAE.

With a complete and vast array of equipments ranging from latest pre press to printing and print finishing equipments and with a work force in excess of 600, our infrastructure allows us to offer competitive prices, quick delivery times to suit all requirements. UPP specializes in jobs such as newspaper printing, magazines, brochures, point of sales products, books, dictionaries, newsletters and marketing collaterals. UPP also have digital machines for small run jobs and outdoor equipment for billboards, POS etc.

United Printing & Publishing

Al Ittihad

Category 3: Heatset-offset printing or UV-cured offset printing on SC or LWC paper

Printing site: Abu Dhabi, United Arab Emirates

The first issue of Al Ittihad newspaper was published on 20th October 1969, in a period when late Sheikh Zayed Bin Sultan Al Nahyan, Ruler of Abu Dhabi was very active, since in this period he was laying a time intensive efforts along with his brothers who were the rulers of other emirates to form union of the UAE. The name Al Ittihad means "The Union" which carries the ideology of symbolism and largely reflects the fact that the newspaper 'Al Ittihad' to be the mouthpiece of the UAE, not only as a community but also a political entity known for its position and direction. The newspaper initially started as a weekly with 12 pages and the circulation was 5500 copies. It was distributed free of cost to be competitive with the newspapers coming from other Arab countries. With the proclamation of the UAE in 1971, Al Ittihad was published for several consecutive days and on the occasion of the fifth anniversary of His Highness Sheikh Zayed Bin Sultan Al Nahyan (may God have mercy on him) being ruler of Abu Dhabi on 6th August 1971, it was published on a daily basis for two weeks. Since 22nd April 1972, 'Al Ittihad' was published as a daily newspaper with 32 pages including few color pages. At a later stage 'Ittihad Sports' supplement with 16 pages was launched and further 'Duniya Al Ittihad' of 16 pages was launched which is a daily magazine with a mix of art & culture. Al Ittihad newspaper was recorded as a first publication using the high end technology to transfer editorial content by satellite for the first time in Arab countries in 1981. This was the time when another printing press in Dubai was established to print the newspaper in Abu Dhabi and Dubai at the same time and to overcome the problems of delay in distribution in the Northern Emirates. Today, Al Ittihad has one of the latest printing presses in the Middle East and produces the best print quality at par with the foreign newspapers. Now a day's Al Ittihad have 100 reporters between Abu Dhabi, offices in Dubai, Fujairah, Ras Al Khaimah and other emirates, as well as offices in Beirut & Cairo and correspondents all around the world. All the journalists are supported by the latest technologies in the newsroom equipped with devices having latest techniques of editing. Al Ittihad has adopted "Rapid Browser" to receive the latest news from the news agencies, edit and follow-up until it reaches the final stage of newspaper printing. It is worth mentioning that Al Ittihad entered the world of internet on Friday 15th March 1996 and was the first local newspaper to provide this service to its readers.

The oldest newspaper in the UAE "Al Ittihad" has been given a facelift with a new contemporary full-colour redesign to coincide with celebrations for its 40th anniversary on 20th October 2009. It now boasts a fresh editorial layout that is more photographically-led than the previous design and easier to navigate. Al Ittihad's website, www.alittihad.ae has also been redesigned in line with the new look for the newspaper. The popular website receives tenths of thousands visits per day from Arab readers in the UAE and beyond.

AL ITTIHAD is printed at "United Printing & Publishing" (UPP), the leading high quality printing and publishing company of the region.

United Printing and Publishing (UPP) is an ISO 9001, ISO 14001, ISO

Financial Times

Category 4: Extra category for newspaper printing
Printing site: Abu Dhabi, United Arab Emirates

First published in 1888 as a four-page newspaper, the Financial Times' initial readership was the financial community of the City of London. The Financial Times soon established itself as the sober but reliable "stockbroker's Bible", with its only rival being the slightly older and more daring Financial News. In 1893, the FT turned salmon pink – a masterstroke that made it immediately distinguishable from its competitor. From their initial rivalry, the two papers merged in 1945 to form a single six-page newspaper.

On January 1st, 1979, the first FT to be printed outside the UK rolled off the presses in Frankfurt. Since then, with its greatly increased international coverage, the FT has become a truly global business newspaper, printed at 22 print centers around the world, and, with over 1.6 million readers world-wide, is the first daily newspaper to sell more copies abroad than in its original home market. The Financial Times now has 4 international editions to serve the needs of its readers in the UK, Continental Europe, the US and Asia, plus its award-winning website FT.com. The European edition of the newspaper is distributed in Continental Europe, Middle East and Africa. It is printed Monday to Saturday at 5 strategically located print centers across Europe, as well as South Africa and Abu Dhabi.

The Financial Times is universally acknowledged as the world's definitive business newspaper and is the flagship of the Financial Times group, a wholly-owned subsidiary of Pearson plc, the international media group. Its team of over 400 journalists across 5 continents presents political, economic and business news from a truly global perspective.

FINANCIAL TIMES is printed at "United Printing & Publishing" (UPP), the leading high quality printing and publishing company of the region.

United Printing and Publishing (UPP) is an ISO 9001, ISO 14001, ISO 18001 Certified Company, has become one of the largest companies in UAE with the state of the art printing facility situated in Abu Dhabi. UPP was started in year 2006 previously known as the Emirates Media Inc., established in early 70's as a part of the prestigious ADMC (Abu Dhabi Media Company) headquartered in Abu Dhabi, UAE and has become the largest commercial as well as newspaper print company in the UAE.

Utusan Melayu (Malaysia) Bhd

Utusan Malaysia

Category 1: Coldset-offset printing on newsprint

Printing site: Kompleks Sri Utusan, Bandar Baru Bangi, Malaysia

Since its establishment in 1938, Utusan Melayu (Malaysia) Berhad has progressed and consolidated itself into multiple media conglomerate known as Kumpulan Utusan (Utusan Group) in Malaysia.

Today, the group's diverse expansion is still synergistic with its traditional core activities. Kumpulan Utusan is engaged in four major business concerns, namely publishing, printing, advertising and online services.

The Group's newspapers consists of influential broadsheet daily and weekly newspapers, Utusan Malaysia and Mingguan Malaysia respectively; and popular daily and weekly tabloids, that is Kosmo! and Kosmo!Ahad.

Utusan operates its printing activities from four printing plants in Peninsular Malaysia – Sri Utusan Bangi in Central region, Seberang Jaya plant in Northern region, Gong Badak plant in the East Coast and Tebrau plant in the Southern Region.

Sri Utusan Bangi is also an ISO 9001:2008 certified newspaper printing facility for Quality Management System since 2008 and with the new continuous improvement work culture, we successfully achieved the International Colour Quality Club award in 2010-2012.

V-TAB AB

VLT

Category 1: Coldset-offset printing on newsprint

Printing site: Västerås, Sweden

V-TAB is the largest printing group in the Nordic countries with operations at 10 locations around Sweden. We print everything from daily newspapers, periodicals, direct advertising, and exclusive magazines to signs and banners. V-TAB is part of the Stampen Group which is a rapidly growing media group and Sweden's largest newspaper owner. V-TAB's size is in many ways a strength – our plants can handle assignments that require great capacity and our geographical spread enables us to meet our customers' needs.

The newspaper VLT is printed at our plant in Västerås, which is a modern printing plant for flexible production of newspapers and printed matter. We print daily newspapers through the night and periodicals such as VISION, Lantbruk and ATL during the day. Our machinery includes two printing presses with four outputs; each one with its own special qualities. Our flexible post press department enables us to provide all types of finishing work.

In Västerås, just as in all our other facilities, quality is an important factor for success and we constantly strive to improve our standards and have received ISO 9001 and ISO 14001 certification. Furthermore all of our facilities are Nordic Ecolabelled, which means that our printing plants take particularly good care of the environment, for example through making optimum use of resources such as ink and paper and eliminating polluting and hazardous chemicals from our production.

V-TAB has undergone a journey from being a newspaper printing house to becoming the largest newspaper group in the Nordic countries. We are now able to offer customers more opportunities and to bring together knowledge from all of our facilities into one single company. We have done this because we want to be a collaboration partner and a full line supplier for print, offering our customers one point of contact for all their print needs. Our journey continues.

Verlag E. Holterdorf GmbH & Co. KG

Die Glocke

Category 1: Coldset-offset printing on newsprint
Printing site: Oelde, Germany

The regional daily newspaper “Die Glocke”, published by Verlag E. Holterdorf GmbH & Co. KG in Oelde, Westphalia, is one of the leading media brands in the Gütersloh and Warendorf areas. Fried Gehring and Dirk Holterdorf are responsible as shareholders with personal liability for managing the business.

With its six local editions, “Die Glocke” has a sold circulation of nearly 57,000 copies in the areas of Gütersloh, Warendorf and Soest. Advertisers have the choice of twelve different coverage units for the newspaper and the freesheet Wersekurier. The share of subscribers is 95 %.

The publishing house also operates the regional Internet news portal www.die-glocke.de that offers news from the area of distribution of the newspaper as well as tips and registration for the e-paper, the 1:1 image of the printed Glocke. Digital news is available on mobile devices under mobil.die-glocke.de.

The publishing house also holds a majority share in the local radio stations Radio WAF (Warendorf area) and Radio Gütersloh (Gütersloh area).

At the main office in Oelde, the main editorial department, organised in accordance with the newsdesk principle, supplies the readers with news from politics, business, culture, Westphalia, sports, tips, and international news. In the publishing building, modernised in 2010, the Glocke am Sonntag newsroom produces the eight-page weekly magazine. “Die Glocke” has six local editorial offices: Gütersloh, Rheda-Wiedenbrück, Warendorf, Ahlen, Beckum and Oelde.

The newspaper is produced in full colour on all pages on a KBA Colora press on six weekdays in the publishing house’s own printing centre. Each edition is planned on the alfa OpenMedia editorial system. The planning data is used both in the plate workflow as well as for press control. In this way, after exposure the plates are automatically pre-sorted according to their position on the cylinder, the press ink keys are pre-set and the soft-proof produced for the printer.

Nürnberger Zeitung

Category 1: Coldset-offset printing on newsprint

Printing site: Nürnberg, Germany

NÜRNBERGER ZEITUNG, one of Germany's oldest daily papers, first appeared on the scene under the name "Der Fränkische Kreis-correspondent von und für Deutschland".

Today, NÜRNBERGER ZEITUNG and its sister paper NORDBAYERISCHE ZEITUNG are sold throughout almost all of the Mittelfranken region (Central Franconia). With an average print run of around 28.000 copies on weekdays and 31.000 on Saturdays, NÜRNBERGER ZEITUNG ranks among the reliable dailies, providing up-to-date, critical coverage on all areas off everyday life.

The paper is printed at VERLAG NÜRNBERGER PRESSE, Druckhaus Nürnberg GmbH & Co. – in the very heart of the city.

Wegener Nieuwsdruk Brabant (WNB)

Maasroute

Category 1: Coldset-offset printing on newsprint

Printing site: Best, Netherlands

Wegener NieuwsDruk Brabant (WNB) is a modern printing plant with advanced machinery and a decisive crew that helps its customers to publish high quality newspapers.

The 3 ultra modern, highly sophisticated offset rotary presses – type Wifag OF 3755 – produce on average 7 million newspapers per week with a speed of 80000 newspapers per hour. WNB prints mainly tabloid newspapers ranging in thickness between 4 and 96 pages, all in full colour. The newspapers can be divided into 1–3 books which are completely independent in size and which can be stitched when desired. The production process is highly automated.

WNB has a process-oriented organisation with a crew of 90 people. Process-orientated means that the organisation is very flat and that production teams themselves stay in contact with customers and support services. This organisational form is deliberately chosen to optimize the customer-orientation and the decisiveness and commitment of the crew. Furthermore it prevents sluggishness and bureaucracy.

Corporate social responsibility is a very high priority within WNB. The company is certified for its environmentally conscious work. We only use renewable raw materials from which all solvents are completely eliminated. FSC or PEFC paper is used on request. In 2012 the certificates for the quality systems ISO 9001 WNB and 12647 will be achieved. Also the certification for the working-conditions-care system OHSAS 18001 will be finished during 2012. Wegener door-to-door newspapers, part of Royal Wegener NV, is the largest publisher of free door-to-door newspapers in the Netherlands. Wegener produces some 225 free door-to-door newspapers and weeklies, which have a total circulation of about 8.2 million copies per week. The products that appear with the quality label “dé Weekkrant” enjoy a strong reputation. Through the high volume, high reach and the high number of combination possibilities the publications of Wegener door-to-door newspapers are an excellent medium for all types of advertising campaigns.

One of the free weekly newspapers is “De Maasroute”, which has a total circulation of 42,000 copies per week. This free weekly door-to-door newspaper gives the reader an overview of the week’s local and national news, articles, interviews, the agenda for the weekend and so on. This title is distributed in Brabant, in the West of the Netherlands. “De Maasroute” has been published since 1969. As well as the printed newspaper, this title also has an online presence.

Wegener Nieuwsdruk Gelderland (WNG)

de Peperbus

Category 1: Coldset-offset printing on newsprint

Printing site: Apeldoorn, Netherlands

In November 1903, in the east-central Dutch city of Apeldoorn, Johan Frederik Wegener began publishing a news and advertising paper, which would later become Apeldoornse Courant (now de Stentor). More than a century later, that small local publishing house has grown into today's leading media group Koninklijke (Royal) Wegener NV, with its headquarters located in Apeldoorn, specialising in regional newspapers and multi-media and listed on the Amsterdam Euronext stock exchange.

Wegener is the largest publisher of regional daily newspapers and free door-to-door newspapers in the Netherlands. Every day approx. 800,000 copies of Wegener's seven regional dailies are delivered to readers throughout a major portion of the country, reaching an average of 2.6 million readers daily. Wegener also produces some 225 free door-to-door newspapers and weeklies, which have a total circulation of about 8,2 million copies a week. In addition, Wegener develops and pursues opportunities involving internet products, including websites with millions of visitors. Another unit of the group provides printed products and graphic services to Wegener companies and external clients.

One of the free weekly newspapers is "De Peperbus" with a total circulation of 58,000 copies per week and a page-count of 48-96 tabloid. This free weekly door-to-door newspaper gives the reader an overview of last week's local and international news, articles, interviews, the agenda for the weekend and so on.

"De Peperbus" is printed by Wegener NieuwsDruk Gelderland with 157 employees, one of the three printing divisions of Wegener NieuwsDruk and is located in Apeldoorn, The Netherlands.

Besides an impressive number of weekly door-to-door newspapers, Wegener NieuwsDruk Gelderland also prints the regional daily newspapers "De Stentor", "De Twentsche Courant Tubantia", and "De Gelderlander" and high quality national and international commercials for Royal Wegener NV and other customers.

Wegener NieuwsDruk Gelderland has also a large range of pre-and after-press activities, such as binding and cutting, sealing, inclusion of information leaflets, wrapping and addressing.

Wegener NieuwsDruk Gelderland produces offset plates with KPG/Creo Trendsetter using Thermal News Plates. Along with the cold set press, Wegener also has a 32 page KBA Commander which enables Wegener Nieuwsdruk Gelderland to print semi-heatset products with the aid of gas drying.

Wegener Nieuwsdruk Twente (WNT)

De Twentsche Courant Tubantia

Category 1: Coldset-offset printing on newsprint

Printing site: Enschede, Netherlands

In November 1903, in the east-central Dutch city of Apeldoorn, Johan Frederik Wegener started publishing a news and advertising paper, which would later become Apeldoornse Courant (now de Stentor). More than a century later, that small local publishing house has grown into today's leading mediagroup Koninklijke (Royal) Wegener NV, with its headquarters located in Apeldoorn, specialized in regional newspapers and multi-media and listed on the Amsterdam Euronext stock exchange.

Every day approx. 800,000 copies of Wegener's seven regional dailies are delivered to readers throughout a major portion of the country, reaching an average of 2.6 million readers daily. Wegener also produces some 225 free door-to-door newspapers and weeklies, which have a total circulation of about 8.2 million copies a week. In addition, Wegener develops and pursues opportunities involving internet products, including websites with millions of visitors. Another unit of the group provides printed products and graphic services to Wegener companies and external clients.

Wegener door-to-door newspapers, part of Royal Wegener NV, is the largest publisher of free door-to-door newspapers in the Netherlands.

In addition, Wegener develops and pursues opportunities involving internet products, including websites with million of visitors and apps for all the regional newspapers.

One of Wegener's regional newspapers is "De Twentsche Courant Tubantia", printed by Wegener NieuwsDruk Twente with 85 employees, one of the three printing divisions of Wegener NieuwsDruk and is located in Enschede. "De Twentsche Courant Tubantia" has roots in the 19th century. "Dagblad Tubantia" (1872) and "Twentsche Courant" (1844) integrated in 1996 into "De Twentsche Courant Tubantia". In addition to "De Twentsche Courant Tubantia", Wegener NieuwsDruk Twente prints two other daily newspapers; "De Stentor" and "De Gelderlander", an impressive number of weekly newspapers and high quality commercials for Koninklijke Wegener NV and other customers.

With the daily newspaper "De Twentsche Courant Tubantia" (7 editions), a daily distributed circulation of approx. 121,000 copies, a page count of 48 tabloid on weekdays, 120 on Saturday, Wegener NieuwsDruk Twente was awarded membership of the International Newspaper Color Quality Club for the third time with two titles in recognition of outstanding printing quality.

Printing is done on 2 x 64 and 1 x 96 tabloid KBA Colora Newspaper presses, installed in 1994 and updated in 2007 (all pages full colour), with the possibility of quarterfold production.

Huis aan Huis Enschede

Category 1: Coldset-offset printing on newsprint
Printing site: Enschede, Netherlands

Established as a small publishing house in November 1903, it has grown into today's leading mediagroup Koninklijke (Royal) Wegener NV, with its headquarters located in Apeldoorn, specialised in regional newspapers and multimedia and listed on the Amsterdam Euronext stock exchange.

Wegener is the largest publisher of regional daily newspapers and free door-to-door newspapers in the Netherlands. Every day approx. 800,000 copies of Wegener's seven regional dailies are delivered to readers throughout a major portion of the country, reaching an average of 2.6 million readers daily. Wegener also produces some 225 free door-to-door newspapers and weeklies, which have a total circulation of about 8,2 million copies a week. In addition, Wegener develops and pursues opportunities involving internet products, including websites with millions of visitors. Another unit of the group provides printed products and graphic services to Wegener companies and external clients.

Wegener door-to-door newspapers, part of Royal Wegener NV, is the largest publisher of free door-to-door newspapers in the Netherlands. Not only the products that appear with the quality label "dé Weekkrant" enjoy reputation, but also specific market segment editions such as car newspapers, job opening pages, broker pages and specials concerning health care are coming more and more to the attention of a diverse target audience of readers. By the high volume, the high reach and the high number of combination possibilities the publications of Wegener door-to-door newspapers are an excellent medium for all types of advertising campaigns.

One of the free weekly newspapers is "Huis aan Huis Enschede" with a total circulation of 72,000 copies per week. This free weekly door-to-door newspaper gives the reader an overview of the last week's local and international news, articles, interviews, the agenda for the weekend and so on. This title is distributed in the eastern part (area of Twente) of the Netherlands. "Huis aan Huis Enschede" is printed by Wegener NieuwsDruk Twente with 85 employees, one of the three printing divisions of Wegener NieuwsDruk and is located in Enschede, The Netherlands.

Excerpt from an impressive number of weekly door-to-door newspapers, Wegener NieuwsDruk Twente also prints the regional daily newspapers "De Stentor", "De Twentsche Courant Tubantia", and "De Gelderlander" and high quality national and international commercials for Royal Wegener NV and other customers.

Printing is done on 2 x 64 and 1 x 96 tabloid KBA Colora newspaper rotary presses, installed in 1994 and updated in 2007 (all pages full colour) with the possibility of quarter fold production.

West Australian Newspaper Ltd.

The West Australian

Category 1: Coldset-offset printing on newsprint

Printing site: Perth, Australia

The West Australian is the only locally-edited daily newspaper published in Perth, Western Australia, and is owned by ASX-listed Seven West Media (ASX: SWM). The West is published in tabloid format, as is the state's other major newspaper, The Sunday Times, a News Limited publication. It is the second-oldest continuously-produced newspaper in Australia, having been published since 1833.

In October 2010, the paper ended its long-term policy of not directly competing for Sunday readership and advertising by re-branding its former Saturday editions as "a weekend read" under the masthead The Weekend West. In consequence, The West Australian was reduced to weekdays-only circulation.

A digital archive subscription enables past editions from July 2004 to be accessed.

The newspaper contains international, national and local news. The paper publishes a supplement titled WestWeekend Magazine which is included as an insert in The Weekend West. The publisher also operates a "breaking news" website (thewest.com.au). In April 2008, the website was expanded to include a video news service called West TV, to compete with similar services from Fairfax Media and News Limited.

The West Australian traces its origins to The Perth Gazette and Western Australian Journal, the first edition of which appeared on 5 January 1833. Owned and edited by Perth postmaster Charles Macfaull, it was originally a four page weekly.

Newspaper House, the former office and publishing plant of The West on St Georges Terrace, across the road from the Palace Hotel, was a prominent landmark in the life of the city and state for over 50 years. In 1988, larger and more modern accommodation for the paper's printing presses was commissioned in Osborne Park. Ten years later, the editorial operations also moved to the Osborne Park complex.

Zofinger Tagblatt AG

Zofinger Tagblatt

Category 1: Coldset-offset printing on newsprint
Printing site: Zofingen, Switzerland

Zofinger Tagblatt was published for the first time on 1 February 1873 and today continues to be the leading newspaper in the region. The former letterpress printshop is now a modern media operation with some 200 employees. Every day newspapers and magazines of regional and national importance are produced there. The company is also a leading producer of customer print objects. In addition, it offers a range of Internet services and acts as a joint operator of a local radio and regional TV station.
